SIGN TRADE SUPPLIES

LASER CUTTING AND ENGRAVING

Our investment in the latest Laser Cutting Systems produces cutting and engraving with extreme accuracy and little waste.

We can cut complex shapes with quality & accuracy. With fast cutting of substrates up to 20mm and a huge 3080 x 2050 working area we can tackle the most complex projects accurately & speedily.

For a stunning polished edge our automated diamond polishers produce an exceptional finish.

VACUUM FORMING

We have over 50 years vacuum forming experience and can supply a complete range of vacuum formed signs including letters, fascias and pans.

Using the very latest tech means we can vacuum form high quality and increasingly complex signs. With four vacuum forming machines providing forming to 1.9m² and 600mm deep we can vacuum form signs in almost any size. We welcome small and large volume projects, as well as fast turnarounds.

DIGITAL PRINTING

We operate diverse large format digital printing services with UV flatbed and solvent presses capable of printing direct to substrate, printing on sheets in a wide range of materials up to 3m x 2m and 50mm thick.

Objects and odd-shaped media can be decorated edge-to-edge with ease. Be guaranteed award-winning image quality with actively adjusted pixel placement. And with super-fast print speeds we can provide a fast turnaround with no loss of quality.

CNC ROUTING

With 3, 4 & 5 axis capability and the sector-leading Zund Cutting System with head-changing capacity, we can fabricate high quality signs & sign components quickly & efficiently.

"No sign project is too small or too complex".

Flat cut letters, logos & shapes, deep cut letters and fret cut trays can be manufactured in a large range of materials including acrylics & foam boards to 25mm, ACM, foam PVC, fluted polyprop and even natural wood.

DRAPE MOULDING

Drape moulding is an ideal way to produce curved or shaped letters, logos and complete signs for maximum impact and exceptional clarity.

Our experienced team and large capacity equipment means we can produce a wide range of drape moulded signage as one-offs or in large volumes. We can drape mould up to 2.5m so there are very few projects that we cannot undertake.

LINE BENDING

We have unparalleled line bending ability with a massive range of equipment backed up by a highly skilled workforce.

We can line bend single or double parallel products as well as more complex forms. Utilising some of the best equipment available means we can bend with exceptional accuracy, offer uninterrupted heat wires where required and bend substrates up to 3m long and up to 25mm thickness. We are able to line bend a large range of acrylics and polycarbonates.

OUR PROCESSES

Over our 50 years in business we've expanded our range of sign making processes to meet the changing needs of the sector. We now work with more and more materials. Investment in tech and people means we can complete projects faster and more efficiently without any loss of quality.

Whatever process you need to make your project a success, you can be sure we offer a market leading combination of extensive & cutting edge equipment plus a skilled manufacturing team.

Some of the materials we work with -

- **Acrylic / Acrylic Mirror**
- **High Impact Polystyrene (HIPS)**
- **ABS**
- **Acrylic capped ABS (ACABS)**
- **Polycarbonate**
- **PETG / PET / APET**
- **Polypropylene**
- **Foam PVC**
- **Aluminium composite board**
- **PVC**
- **Bencore**
- **Solid Surface**
- **RPET**

RETAIL SIGNAGE

With over 50 years' experience of the retail sector, we are the first choice for shop and retail signs.

From external signage to internal signs and wayfinding, we can manufacture a complete range of signage using some of the latest tech around across a whole range of materials. We'll keep everything 'on brand' and on budget. We match many retail clients in our drive towards ethically-sourced and sustainable signage solutions.

"We've lots of cutting-edge kit and lots of people at our 46,000 sq ft manufacturing base so we can turn projects around quickly and efficiently without compromising on quality".

NAVIGATIONAL SIGNAGE

Take a step in the right direction with our massive range of navigational signage solutions.

Whether adding to an existing system or looking for a complete wayfinding solution we can help. We manufacture a range of interior and exterior directional signage including vinyls, window graphics and decals, routed signs and engraved signs. We can manufacture from a wide range of materials, and can even help you design effective directional signage for your customer.

ILLUMINATED & BACK LIT SIGNS

See your signage project light up with our help.

We've a host of options to help you create a cost-effective energy-efficient external & internal illuminated signage solution for your client - and our manufacturing team will do the rest. From the straight-forward to the complex, we'll deliver a high quality solution in the fastest possible time. Our range includes lightbox signs, LED signs, face lit, back lit & edge lit signs, fake neon, external trough lights.

LETTERING

We manufacture a wide range of lettering for use in interior and external signage.

Range includes fret cut, built-up, back lit, face lit and edge lit lettering, pan channel lettering and vinyl lettering. We can manufacture using an extensive range of materials and with our large capacity cutting-edge equipment we can deliver even on the largest and most complex requirements.

VACUUM FORMED SIGNS & FASCIAS

We have a long experience of creating high impact high quality vacuum formed fascia signs for sign makers.

With 50 years of vacuum forming experience and the latest large capacity kit we can turn almost any idea into a durable sign. With our retail brand knowledge, we can ensure we fully comply with any guidelines to create fully 'on brand' fascia signage. Or our design team can help you create an eye-catching sign that will make the most of your customer's available space.

PAN SIGNS AND TRAY SIGNS

We offer cost-effective pan sign / tray sign manufacturing for sign makers.

Offered in any size with return edges to suit your requirements, the pan signs can also be illuminated. We can make pan signs in almost any shape and complex design using our large range of cutting-edge machinery as well as over 50 years fabrication skills. Manufactured from a range of materials including ACM and acrylic, with almost unlimited colour choice.

OUR PRODUCTS

We manufacture a wide range of high quality signs and components for sign makers.

We work with sign makers and sign companies across UK & Europe to manufacture high quality signage products in lots of materials. From simple lettering to complex projects, we've become a trusted partner thanks to our quality, value and service. We've standard products that are perfect for most needs - or our design team can develop bespoke solutions for our manufacturing team to create.

OUR VALUE ADDED SERVICES

From design to delivery we can help.

We've developed lots of inhouse services to support sign makers. They can mix and match services depending on the project. Having an experienced reliable partner has helped our customers grow their businesses - giving them the confidence to tackle larger and complex sign projects.

"Our design team already work with lots of clients in many sectors delivering effective signage, POS and branding solutions".

DESIGN SERVICES

We'll take your (or your customer's) idea and turn it into a reality.

Our design team already work with lots of clients in many sectors delivering effective signage, POS and branding solutions. They will take time to understand your aims, as well as budget and timescales before developing their design.

With a detailed knowledge of materials, design trends and the capabilities of our cutting-edge kit the design team will work with you to develop the right solution.

WHITE LABEL DESPATCH

We can handle the distribution of your completed signs across the UK & beyond.

Rolling out across a client's network is something we do on a daily basis. Our dedicated team work with a range of trusted couriers and delivery services to make sure the signs are delivered to your customers, requirements and that they arrive on time and undamaged.

This White Label service ensures our name is nowhere to be seen. As far as your customer is concerned the sign has come straight from you to them - that's a great boost for your business without the hassle of sorting complex distribution.

ASSEMBLY AND FABRICATION

For larger volume or complex jobs that require assembly we have a large and skilled workforce to take the strain.

With flexible working practices, large warehousing and lots of assembly experience we can take on projects large & small - you'll be able to deliver on time to your customer without the need to take on extra staff or work even longer hours!

We are also able to fabricate signs even when we have not manufactured any parts. Take advantage of our 46,000 sq ft workshop, additional 9,000 sq ft warehousing, our skilled team and fabrication experience to ensure your signs are finished to an exacting standard.

STORAGE

We've plenty of capacity for you to store completed signs and call off as required.

As well as a 46,000 sq ft manufacturing base, we have also invested in over 9,000 sq ft of warehousing & can access even more when required! For customers without that space it means we can offer storage services - their workshops remain uncluttered and they don't have to source short term storage.

When the signs are needed or roll out begins, let us know & we'll sort that too.

PROJECT MANAGEMENT

All the support you need from a really dedicated team.

From initial enquiry to completion and beyond, we think our level of support makes a big difference to our clients. We'll be clear from the outset about prices and timetables. We'll talk you through the options. We'll keep you up to speed once the project is being manufactured. We'll confirm successful delivery to you or your client.

You'll get support from experienced staff with an expert understanding of materials and processes. They know that it's essential to the reputation of your business that signs are made to the very highest quality, and delivered on time and on budget.

OUR LED LIGHT POCKETS

The UK's #1 choice for high impact window & interior displays, our UK-made LED light panels are stylish, durable – and sustainable.

We use maintenance-free low voltage LEDs with a minimum life expectancy of 30,000 to 60,000 hours.

NO SPECIALIST ELECTRICAL INSTALLATION required.

LED lightpockets offer display & signage solutions for -

- **shops, showrooms and sales centres**
- **estate agents**
- **hair and beauty salons**
- **QSRs, food-to-go and takeaway restaurant**
- **travel agents**
- **recruitment agents**
- **& loads more locations**

MADE IN THE UK

We are committed to UK manufacturing.

All our LED light pockets are made in the UK – that's good news for jobs and investment & means every product is manufactured to the highest standard. Using the latest in design and manufacturing know-how our LED light panels are stylish & durable. A 12 month warranty is offered as standard.

THE BRAND LEADER

We have made & sold over 150,000 LED lightpockets.

We offer a huge product range to suit any project & our support teams are on hand to offer expert advice. Our 3D visuals take the guess work out of how the completed project will look. Most standard products are available to order online for Next Day Delivery.

As a manufacturer we are also able to make bespoke solutions to suit your needs. With an almost endless choice of colours, finishes and configurations we have a solution as unique as your project.

SUSTAINABLE DISPLAY SOLUTIONS

We always aim to minimise our impact on the environment.

The acrylic we use to make our LED light pockets is fully recyclable. The metal and LED components can also be recycled. We use the latest energy-saving LED – and with up to 60,000 hr life expectancy they offer a long-term display & signage solution.

“Offering a long-term **display & signage** solution”.

“**UK's #1** choice for high impact window & interior displays”.

“We have made & sold over **150,000** LED lightpockets”.
