

## COMPLETE RO-SCREEN SAMPLING INSTRUCTIONS

**STOP PLEASE READ ALL INSTRUCTIONS COMPLETELY BEFORE COLLECTING YOUR WATER SAMPLE STOP**

**This test kit represents one sampling location. If you require testing on multiple locations you will need to purchase multiple test kits.**

1. Freeze the blue gel ice pack for at least 8 hours prior to sample collection. Return to the cooler just prior to sampling and/or return shipping.
2. Do not rinse bottles as they may contain preservative necessary to ensure accurate results. Fill larger bottles to the neck of the bottle and cap securely. Remove the smaller vials from their bubble bags and completely fill the vials so there are no air bubbles, cap securely. Return the vials to the bubble bags and seal each bag. This sample kit is designed for one sample location, **please fill all bottles from the same location. *\*\* DO NOT SEND RO CONCENTRATE or WASTEWATER SAMPLES\*\****
3. Complete the enclosed lab form, **making sure to indicate the collection date and time you sampled**, type of water (city treated/untreated) and sample identification which identifies where you collected your sample (i.e., pre-carbon, post-carbon, etc.). Retain a copy of the lab form for your records and return the completed form to the shipping container.
4. **Ship your sample to the testing location below. The sample should be sent via guaranteed overnight delivery.**

Testing Location: **National Testing Laboratories, Ltd.  
556 South Mansfield Street  
Ypsilanti, MI 48197**

5. PLEASE NOTE: Testing typically takes approximately 7-10 business days from receipt of the samples. Results will be emailed upon completion.

**NOTE: *The lab reserves the right to reject water samples that appear to be excessively contaminated as they may cause potential damage to laboratory equipment.***

***\*\* If you need to test RO Concentrate or Wastewater samples, please call 1-800-458-3330 for more information.***
