Ring Size Guide

Please print this page in the highest resolution possible on a US Letter sized paper (8.5" x 11") scaled to 100%.

You'll know if it is scaled correctly if the line below measures 1" when you print it out.

To find out your ring size, please match an existing simple thin round ring to one of the circles below. The ring you use to measure should be plain such as a classic wedding band and should easily come on and off your finger to ensure accuracy.

A ring that has stones or a different shapes may result in an inaccurate measurement.

Place your existing ring on one of the circles below. You'll know you've found your size when you only see the white circle, without any of the pink background showing through.
