

Home HQ

Quick Start Guide

What it does

Control and monitor your home, all from your phone.

DOWNLOAD APP
Connect to Wi-Fi and pair your Home HQ smart home devices in seconds.

GATEWAY

TEMPERATURE & HUMIDITY SENSOR

Check the temperature and humidity of any room in your home, and set rules and alerts for when things change.

SMART PLUG

Track your energy use and turn appliances on and off automatically, or on command

MOTION SENSOR

Set up a motion sensor anywhere in your home where you want to detect movement.

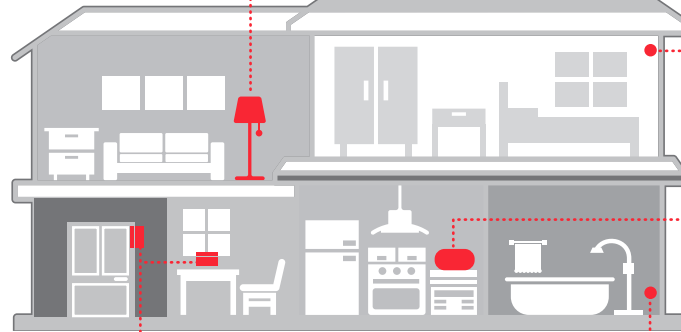

SMART BULB

Turn lights on and off automatically with rules, or on command.

ENTRY SENSOR

Detect when doors or windows are opened.

Control and convenience

At any time of day you can use the App on your phone to control any Home HQ device in your home, from wherever you are.

By setting rules, your devices can talk to each other

For example, if motion is detected at a certain time of day, it can turn an appliance on or off via a Smart Plug.

Get notifications

Create alerts for yourself, friends, and family based on the activity of your Home hQ devices, and your customized rules.

How it works

Turn your house into a smart home by connecting Home HQ devices to the App on your phone.

Download the Home HQ App on your phone to control your home.

The App talks to a central Home HQ Gateway via Wi-Fi, using a modem in your home.

The Gateway connects wirelessly to all the devices in the Home HQ kit.

You can control and monitor smart devices from your phone - any time, anywhere.

You can even use Amazon Alexa or Google Home to control devices by voice.

Connect an old phone or iPad as a camera to keep an eye on your home, capture photos or video, and send you alerts.

Add family members to your account so they can keep an eye on your home through the Home HQ App on their own phone.

Set rules and notifications to respond to certain devices actions. Rules can be set according to different location modes, such as HOME or AWAY.

APP

1

Download the App

If you're new to Home HQ, turn over and read the introduction to how it works on the reverse of this guide.

The Home HQ App walks you through a step-by-step guide to set up your kit.

Here's how you get started.

iOS

1. Open App Store
2. Search for **Home HQ**
3. Get App

ACCOUNT

2

Create an Account

1. Open Home HQ App
2. Select **New User**
3. Enter your email address
4. Enter a password
5. Select **Use this Device as Remote Control**

Android

1. Open Play Store
2. Search for **Home HQ**
3. Install App

GATEWAY

3

Connect and install the Gateway

1. Open Home HQ App
2. Select **Cameras & Devices**
3. Select **Add Devices**
4. Select **Add Gateway**
5. Scan QR code on Gateway
6. Follow step-by-step instructions in App
7. Connect Gateway to power and internet
8. Green light indicates connection

DEVICES

4

Connect a Sensor, Smart Bulb or Smart Plug

1. Open Home HQ App
2. Select **Camera & Devices**
3. Select **Add Devices**
4. Choose the **Device** to connect

Entry Sensor, Motion Sensor & Temperature/Humidity Sensor

1. Position sensor close to Gateway
2. While App is in pairing mode, remove plastic tab from sensor
3. App will automatically pair devices

Smart Bulb & Smart Plug

1. Connect Smart Bulb or Plug to power
2. Switch on
3. App will automatically pair devices

LOCATION

5

Set up location modes with Geofencing

You can manually adjust your location mode, and set rules and notifications based on this mode.

1. Go to Home HQ App
2. Select **Home Mode**
2. Set your location manually by selecting **HOME, AWAY, VACATION, STAY or SLEEP**

*Home HQ can also understand where you are, by using GPS on your phone. It can automatically adjust to **HOME** or **AWAY** mode as you leave home or return.*

1. Go to Home HQ App
2. Select **Home Mode**
3. Toggle to **Geofencing > Active**
4. Set your home location

CAMERA

6

Choose to use a spare smart phone or tablet

Capture photos or video at home with a spare device. View footage any time, anywhere, on your primary phone.

1. Connect your spare device to Wi-Fi
2. Download the Home HQ App on the spare device, as in **Step 1**
3. Open Home HQ
4. Login details from **Step 2**
5. Select **Use this Device as a Camera**
6. Select **Options** and change as required

To access the video stream on your primary phone:

1. Select **Cameras & Devices**
2. Select **Remote Cameras**

RULES & NOTIFICATIONS

Choose when and how you want to receive alerts

Set rules to automate tasks and receive notifications based on events.

Example rule:

*"If the time is 5.30pm on Saturday and I am in **Away** mode then make my **Smart Plug** switch on."*

To view current rules:

1. Go to Home HQ **Menu**
2. Select **Create Rules**

To edit an existing rule:

1. Tap a category of rules (e.g. 'While you're in a mode...')
2. Tap a rule to edit – you can tap on the **If** statement to change the conditions of the rule
- 3 Tap on the **Then** statement to change the action
4. Toggle rules on/off

To create a new rule:

1. Go to Home HQ **Menu**
2. Select **Create Rules**
3. Add **Rule**

TIP: You can use multiple **If** and **Then** statements by tapping the **+** symbol

USERS

Add additional users to your account

1. On the additional user's phone, install the Home HQ App as in **Step 1**
2. Open Home HQ
3. New user signs in using your login details from **Step 2**
4. All sensors and rules are now synced across devices
