

**INSTRUCTIONS:**

- Open seal on top of valve and squeeze base of valve which allows air to flow inward.
- While squeezing base inflate with steady exhalation; making sure not to over-exhaust yourself.
- If you are using an electric or manual pump be sure inflation adaptor extends past compression valve at base of valve to insure ease of inflation.
- When inflated to your desired pressure replace valve and push fully in to item so that valve becomes flush with surface of item.
- It is important to note that when exposed to cooler air or water the air within inflatables contracts making it necessary to re-inflate as need arises.

**SPECIAL NOTES:**

- If your item is a nylon covered inflatable re-adjustment of inflatable bladder may be necessary during inflation
- Inflation valves on some nylon covered inflatables may be located within a Velcro flap or zippered compartment.

**CARE & MAINTENANCE:**

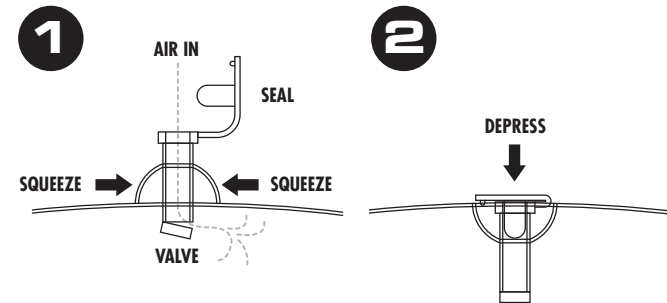

- Store item after it has been rinsed with fresh water and dried.
- Store in a dry and cool place
- If cleaning is necessary use mild soap and be sure to test a small area before cleaning entire unit.
- Please note that over exposure to chlorine & UV rays will cause fading over time.

**WARNING !**

THIS IS NOT A LIFESAVING DEVICE. DO NOT LEAVE CHILD UNATTENDED WHILE IN USE. USE ONLY UNDER COMPETENT ADULT SUPERVISION. ONLY TO BE USED IN WATER IN WHICH THE CHILD IS WITHIN ITS DEPTH AND UNDER SUPERVISION.

**WARNING: WILL NOT PREVENT DROWNING!**
