MDS Inc. is a family-owned business established in 1972. MDS is dedicated to provide our customers with unique and affordable optical, video, and lighting equipment for the animal health industry. Offering endoscopy services allows clinics to increase revenue while providing a specialty service for clients. All MDS products are offered with a one year warranty against manufacturer's defects. Our unparalleled customer service provides quick response time and excellent professionalism.

Flexible Micro-Endoscope

The Flexible Micro-Endoscope is the smallest endoscope in the veterinary marketplace providing great versatility in the diagnosis of diseases in upper respiratory and urinary tracts of most companion animals, especially exotic animals. This endoscope is easily adaptable to existing light sources and video systems.

- 1.67 mm O.D. (1 mm available)
- 10,000-fiber image bundle
- ACMI-Storz®-Wolf lightpost
- Compatible with most cameras
- Completely immersible
- Portable LED light source with 2 “CR123A” batteries (included)

Item	Product Description	UOM
48018	Flexible Micro-Endoscope, 1.67 mm x 20”	Each

“This compact semi-flexible endoscope is the perfect size (1.67 mm outer diameter) for evaluating the nasal cavity of small dogs and cats. It can also be used for ear examinations, is portable and durable.”

- Dr. Lynelle Johnson, UC Davis

Endoscopes

Semi-Flexible Micro-Endoscope

The Semi-Flexible Micro-Endoscope allows diagnostic capability in areas of the body that are usually inaccessible. Although designed to aid in the placement of endotracheal tubes in small mammals, this endoscope may be used for feline and canine rhinoscopy, otoscopy, and cystoscopy. This diagnostic tool provides a crisp, clear image and is adaptable to most video systems and light sources.

- 1.9 mm O.D.
- 10,000-fiber image bundle
- ACMI-Storz®-Wolf lightpost
- Compatible with most cameras
- Completely immersible
- Portable LED light source included

Item	Product Description	UOM
48012	Semi-Flexible Micro-Endoscope, 1.9 mm x 6"	Each
48015	Semi-Flexible Micro-Endoscope, 1.0 mm x 6"	Each

"I have been using the 1.9 mm semi-flexible scope from MDS for years now. I know there are some technicians out there who can blindly intubate with one hand tied behind their backs, but I've seen too much food material too close to the glottis through my scope, and worry too much about potential trauma to try this. I wouldn't do rabbits without my scope now! It costs a little more than a full set of vgels, and I think more versatile as you are less likely to dislodge the ET tube when manipulating the patient. Once you develop your technique, it's a piece of cake."

- Laurel Harris, DVM
Wasatch Exotic Pet Care
Salt Lake City, UT

Exam Room Video Otoscope System

The Exam Room Video Otoscope System provides the small animal practitioner with a high quality, affordable otoscope system for patient examination and client education. Increase customer's confidence by demonstrating the latest technology in ear disease diagnosis and treatment. Camera and light source are compatible with other endoscopic equipment.

- High quality optical endoscope
- Converts to 2.7 mm
- Color CCD camera
- Halogen light source and light cable
- Color monitor
- Compact system

Item	Product Description	UOM
48008	Exam Room Video Otoscope System	Each

Endoscopes

Gastrosopes

The Gastroscope is ideal for the small and large animal practitioner who wants a high quality, affordable endoscope for upper and lower GI examinations, as well as upper airway examinations in equine patients. With the 2.0 mm channel, the user may remove foreign bodies and check for pathology. Automatic air/water and suction improves the ease and efficiency of procedures. Gastroscope includes: biopsy, grasper, cleaning brush, case, and light source. Camera and USB adapter for PC viewing/recording are available.

Fiber Gastroscope

- 3.5" monitor included in the Video Gastroscope system to record still pictures and video

Video Gastroscope

Item	Product Description	UOM
48005	Fiber Gastroscope, 2.0 mm channel, 8 mm x 150 cm	Each
48005-1	Video Gastroscope, 2.0 mm channel, 9.2 mm x 150 cm	Each
48005-2	Video Gastroscope, 2.0 mm channel, 9.8 mm x 300 cm	Each
48005-3	Video Gastroscope, 2.0 mm channel, 12 mm x 300 cm	Each

Transcervical Insemination Endoscope Kit

The MDS Transcervical Insemination Endoscope Kit is an affordable and effective solution for artificial insemination. The kit is adaptable to most existing light sources and video systems. The operating sheath will accommodate a 5FR catheter for semen delivery, as well as dual stopcocks for insufflation/irrigation and suction.

Kit includes:

- Endoscope - Two versions available depending on breed
 - ◊ 4 mm x 302 mm
 - ◊ 4 mm x 380 mm
- 7 mm sheath with 2 mm operating channel (6FR) and dual stopcocks
- Lightpost adapters for ACMI-Storz®-Wolf
- Insufflation bulb

Item	Product Description	UOM
48022	Transcervical Insemination Endoscope Kit, 302 mm	Each
48025	Transcervical Insemination Endoscope Kit, 380 mm	Each

Surgical Loupes

Surgical Loupes

A high quality affordable set of Surgical Loupes with 2.5X magnification and 19" working distance. Surgical Loupes are ideal for dental and surgical procedures. Adjustable inter-ocular barrels allow for multiple users.

Kit includes:

- Loupes
- Head strap
- Safety frames
- Tool kit for adjustments
- Carrying case

Item	Product Description	UOM
48320	Surgical Loupes, 2.5X	Each

LED Clip Light for Surgical Loupes

- 100 lumens of bright white light
- 100,000 hour LED life expectancy
- Operates on 3 "AAA" batteries (included)

Item	Product Description	UOM
48315	LED Clip Light for Surgical Loupes	Each

Surgical Loupes and LED Clip Light

Single LED Headlight

The Single LED Headlight is a battery-powered LED headlight with 100,000 hour LED (light emitting diode) for surgical procedures or general examination. Two-way headband adjustment on this lightweight headlight make it the ideal portable lighting solution.

- Overhead strap for comfort
- Adjustable headband
- Adjustable light position
- 100 lumens of bright white light
- Operates on 3 “AAA” batteries (included)
- Optional, interchangeable lenses available

“I am enjoying the headset and would like to get two more for the other exam rooms.”

- Dr. Charles Stuhr

Item	Product Description	UOM
48305	Single LED Headlight	Each

Note:

*Have a closer look using our
Clip-On Magnifying Lens
shown on page 8!*

LED Headlights

Dual LED Headlight

The Dual LED Headlight is designed for equine dentistry with an articulated light mount that allows the user to position the light between the user's eyes for no-shadow viewing of the work area.

- LED light lasts for 100,000 working hours
- Two white LED's (100 lumens each)
- Overhead strap for comfort
- Adjustable headband
- Adjustable light position
- Operates on 6 "AA" batteries (included)
- Optional interchangeable lenses available

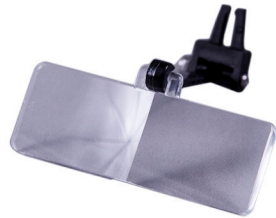

Item	Product Description	UOM
48308	Dual LED Headlight	Each

Clip-On Magnifying Lens

The Clip-On Magnifying Lenses for use with all LED Headlights provide 1.5X to 2.75X magnification. The "floating" lens creates a comfortable, open configuration compared to standard magnifiers.

Lens working distances:

- 1.5X - 20" working distance
- 1.75X - 14" working distance
- 2.0X - 12" working distance
- 2.25X - 8" working distance
- 2.75X - 6" working distance

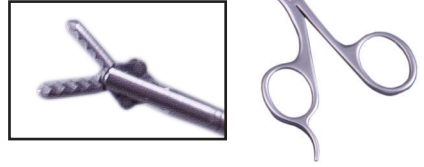

Item	Product Description	UOM
48350	Clip-On Magnifying Lens, 1.5X	Each
48351	Clip-On Magnifying Lens, 1.75X	Each
48352	Clip-On Magnifying Lens, 2.0X	Each
48353	Clip-On Magnifying Lens, 2.25X	Each
48354	Clip-On Magnifying Lens, 2.75X	Each

Foreign Body Forceps & Ear Loop Curettes

Alligator Foreign Body Forceps

The flexible Alligator Foreign Body Forceps is an ideal tool when working in the ears, nose, and other hard-to-reach places. The flexibility of the forceps allows for greater maneuverability of the spring-loaded jaws. The forceps are also available in a biopsy-jaw version. The stainless steel construction allows for autoclave sterilization and provides more durability compared to other instruments.

- 4.5FR (1.6 mm) - 8" length
- Stainless steel construction
- Compatible with MedRx®, Storz®, and MacroView™ otoscopes
- Biopsy-jaw version available

Item	Product Description	UOM
48405	Alligator Foreign Body Forceps, 4.5FR	Each

Ear Loop Curettes

The stainless steel, flexible Ear Loop Curettes are an ideal tool for removing cerumen and plugs from ear canals. The 1.8 mm shaft is compatible with MedRx®, Storz®, and most other video otoscope systems including a standard handheld otoscope. The Ear Loop Curettes are available in small (3 mm) or large (5 mm) sizes.

Item	Product Description	UOM
48408	Ear Loop Curette, Small Wire Loop, 3 mm	Each
48410	Ear Loop Curette, Large Wire Loop, 5 mm	Each

Note:

Use the Alligator Foreign Body Forceps and Ear Loop Curettes with the Exam Room Video Otoscope System!

Aspheric Lens

20 Diopter Aspheric Lens

The 20 Diopter Aspheric Lens combines all the necessary features into one durable and high quality unit. The high density plastic lens and coating are scratch-resistant and drop-resistant. The large diameter (2") provides a greater field of view for examinations. The velour storage pouch protects the lens when not in use.

Item	Product Description	UOM
48430	20 Diopter Aspheric Lens	Each

Note:

Use the Probe-Lite shown on page 12 if you require additional light for your exam!

Battery-Powered Cautery Kit

Battery-Powered Cautery Kit

The Battery-Powered Cautery Kit is convenient and portable for cauterizing bleeders, removing skin tags, or accomplishing many other tasks that normally require an electro-cautery setup. At 2,200 degrees Fahrenheit, this kit is also useful in trimming beaks and nails on smaller patients and exotic animals.

Kit includes:

- ◇ 3 tips
- ◇ 2 “AA” batteries
- ◇ Carrying/storage case

Item	Product Description	UOM
48420	Battery-Powered Cautery Kit	Each

Replacement Tips

48421	Fine Tip	Each
48422	Fine Tip (Loop)	Each
48423	HD Tip, .018”	Each
48424	Fine Tip, 4”	Each
48426	Fine Tip, 6”	Each
48427	XOMED Tip	Each

Probe-Lite

Probe-Lite

The Probe-Lite flexible egg candler features a bright, recessed incandescent bulb at the terminus of the flexible shaft. The bulb is protected from breakage and is placed flush with the egg surface for inspection. Locate hairline fractures and repair the damage to facilitate normal development and hatching. Fertility or infertility may be determined by the fifth day of incubation allowing for the removal of unfertilized eggs. The Probe-Lite is manufactured to withstand harsh conditions and is powered by 2 “AA” batteries (included).

Item	Product Description	UOM
48330	Probe-Lite	Each

Portable Woods Lamp

Simply scan the skin surface for any diseased tissues. The long UV wavelength will fluoresce the affected areas. The Portable Woods Lamp is also a flashlight for use in the office or in the field.

- Operates on 4 “AA” batteries (included)

Item	Product Description	UOM
48333	Portable Woods Lamp	Each
