Dear Duane and all the Team at Internet Removals

16.2 .2018

May we take the opportunity to thank you and your colleagues for all you have been able to achieve for our services and staff alike. We had tried everything to get the false, misleading and ambiguous content removed from our Google reviews, with no success. Google were really not interested and claimed they absolutely could not do anything for us even though the reviews were false, malicious and we could categorically prove this.

We had been advised so many times by so many different people that the content could not be removed and we were basically wasting our time and money . Therefore we came to believe this and accept our fate. When researching our options on how to manage the situation. We came across Internet Removals. At this stage we were very sceptical and weary people to work with. And not easy to convince of anything. Because, we were convinced nothing could really be done to remove the content.

However the people at Internet Removals were patient and generous in their time and explanations. And They never pressured us in any way. They certainly did not at any time promise us anything either, however they committed to give it there best efforts and that they did.

Because ,when we received an email advising us that Internet Removals had been successful in removing the false, misleading and ambiguous reviews that were hurting our service and staff we could not believe it. This quickly led us to check our Google reviews . To our amazement, the email was telling the truth and the people at Internet Removals had achieved for us what we could not achieve , the content had been removed . We really did not believe our eyes and therefore we logged in again and again to see the reviews and to confirm for ourselves that, yes the content was most certainly not there any longer.

By affording the hard working and highly professional team at Internet Removals the opportunity to do what they are trained and skilled at, we were pleasantly surprised and will forever be grateful for all they have been able to achieve for our service and staff.

So please if you are ever in a similar situation, where you have malicious reviews or content damaging your business and upsetting your honest and hardworking staff then do not wait or waste time . Immediately reach out to the Team at Internet Removals and you will find that they will work hard and do their best for you. They also keep you updated throughout the whole process. We would have no hesitation in recommending Internet Removals to anyone or any service or business.

Thank you again

Business Administration Officer
