

Thunderbolt Instructions

Thank you

for purchasing the Thunderbolt.

To fully enjoy your device safely, we recommend you read all of the information in this booklet before play.

Product Information

Materials

Body

Polycarbonate & Silicone

Shock Plates

Zinc Alloy

Weight

35g

Battery Standard

600 mAh

Charging Voltage

5V1A

Discharge Voltage

< 250V

Charging Time

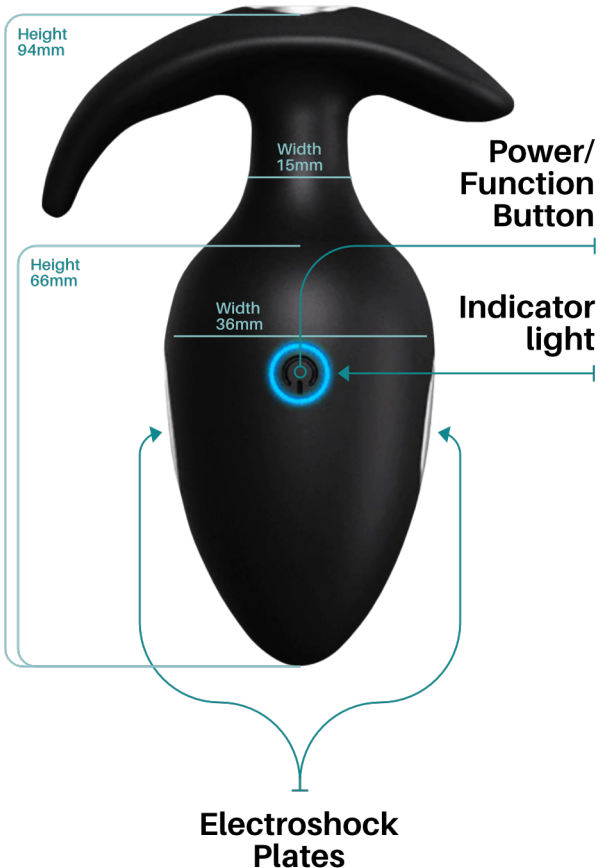

5-8 hours

Waterproofing Grade

IP67

Thunderbolt Schematics

Pairing Your Thunderbolt

The Thunderbolt is designed to be used with the QIUI app.

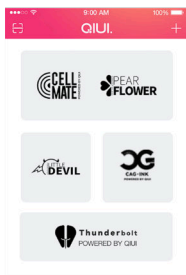

Before use you will need to pair your device with the app to access the additional features of the plug.

Scan the QR code below, or search for QIUI App on your app store to download the app.

Once you have the app installed, press and hold the button on the front of your Thunderbolt to activate pairing mode. The indicator light will blink green.

In the app, tap the + to begin adding a new device, and follow the on screen instructions to pair the device with your phone.

If you wish to give control of your device to another person, they will also need to download the QIUI app and you will need to add them to your friends list.

Then you can hand over control and they can use their phone to control your device.

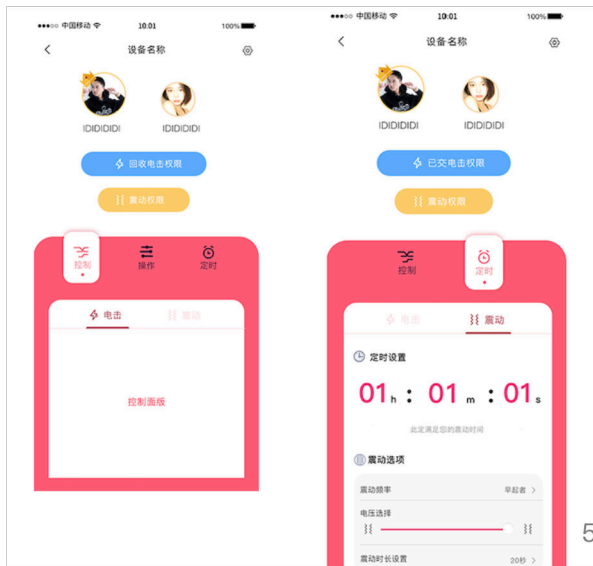

Using Your Thunderbolt

Once your device is paired and you are ready to start using it, follow the same process you would for inserting any other anal toy.

For best results, ensure the shock plates are facing the front and back of your body as you insert the device. The base of the plug should nestle between your legs and butt cheeks.

We recommend using water based anal lubricant while inserting the device. Take your time during insertion and if you feel any pain stop, take a break, and then try again.

The device can be programmed using the QIUI app. Once programmed, the device will continue to perform the chosen action even after the app has been closed.

Recharging Thunderbolt

Your Thunderbolt comes with an included charging cable, which can be plugged into a usb port to recharge your device. This usually takes 5 to 8 hours for a full charge.

When charging, the indicator light on the front of your device will light up red. When fully charged, the indicator light will turn green, and you can unplug the device.

Safety Information

To ensure safe operation of your Thunderbolt, please follow the guidance below.

- Clean the device after every use, using warm soapy water.
- Avoid puncturing or cutting the device with any sharp objects.
- If you experience any pain, congestion, bleeding, or anal swelling, discontinue use immediately and seek medical advice.
- Do not expose the device to high temperatures or an open flame.
- Do not share your device with any other users, as this may cause health problems.
- Do not expose the device to strong impacts or large drops.
- Keep out of direct sunlight.
- Take care when using your device and ensure that you use it in a safe way. Due to the nature of the device, incorrect use can lead to physical injury.
- This product is not intended for any medical uses.

**Enjoy your
Thunderbolt!**
