1. Identification

Chemical Name. Used cooking oil fatty acid glycerol formal esters (and) used cooking oil fatty acid methyl esters

CAS Number. 1367625-65-7 / 67762-26-9

Recommendation for the chemical and restrictions on use

Applications Research and development only. This product is being sent to you as a Research and Development product as defined by the Toxic Substances Control Act (TSCA) of 1976. Due to TSCA's R&D exemption, this product is not listed on the U.S. EPA's Toxic Substances Control Act inventory.

Restrictions This product may not be used for commercial purposes or in formulations used for commercial purposes.

Supplier's Details

InKemia Green Chemicals, Inc.
1213 West Loop North Suite 140, Houston, TX 77005
+1 (713) 909-7717
web@inkemiagreenchemicals.com

Emergency contact number

InKemia Green Chemicals, Inc.
Tel: +1 (713) 909-7717
For emergency calls only.

2. Hazards

Classification of the substance or mixture

Classification Causes mild skin irritation (Category 3), H316. Causes eye irritation (Category 2B), H320.

Label elements

Pictogram None.

Signal word Warning

Hazard Statements H316 - Causes mild skin irritation.
H320 - Causes eye irritation

Precautionary Statements P264 - Wash skin thoroughly after handling.
P271 - Use only outdoors or in a well-ventilated area.
P303 + P361 + P353 - IF ON SKIN (or hair): Take off immediately all contaminated clothing Rinse skin with water [or shower].
P305 + P351 + P338 - IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do.
Continue rinsing.
P337 + P313 - If eye irritation persist: Get medical advice/attention.
P362 - Take off contaminated clothing.
P370 + P378 - In case of fire: Use dry sand, dry chemical or alcohol-resistant foam for extinction.
P403 + P235 - Store in a well-ventilated place. Keep cool.
P501 - Dispose of contents/container to an approved waste disposal plant.

3 - Composition/information on ingredients

Substances
Chemical Name.
Used cooking oil fatty acid glycerol formal esters (and) used cooking oil fatty acid methyl esters

Synonyms.
Reaction mixture of fatty acid glycerol formal esters and fatty acid methyl esters, derived from used cooking oil.

CAS Number.
1367625-65-7/ 67762-26-9

Molecular Formula.
C19.4H36.6O2.6

Molecular Weight. (g/mol)
310.786

Hazardous components

Note: For the full text of the H-Statements mentioned in this Section, see Section 16.

Impurities and stabilizing additives
Additivised with 1000 ppm of butylated hydroxytoluene (BHT).

Mixtures
This product is a mixture of fatty acid methyl esters with an average composition of:

- Palmitic acid glycerol formal esters 6 wt.%
- Stearic acid glycerol formal esters 2 wt.%
- Oleic acid glycerol formal esters 15 wt.%
- Linoleic glycerol formal esters 7 wt.%
- Linolenic acid glycerol formal esters 1 wt.%
- Palmitic acid methyl ester 12 wt.%
4 – First-aid measures

Description of first aid measures

General information
Get medical attention if any discomfort continues. Show this Safety Data Sheet to the medical personnel.

Inhalation
Remove from exposure, moving to fresh air. Artificial respiration and oxygen are necessary if not breathing. Consult a physician.

Ingestion
Wash out mouth with water if the person is conscious. Do not induce vomiting. Consult a physician.

Skin contact
Immediately wash skin with soap and copious amounts of water.

Eye contact
Immediately irrigate with copious amounts of water for 15 minutes. Consult a physician.

Protection of first-aiders
First aid personnel should wear appropriate protective equipment during any rescue.

Most important symptoms and effects, both acute and delayed

General information
The severity of the symptoms described might vary depending on the concentration and length of exposure.

Inhalation
None known.

Ingestion
Slightly dangerous.

Skin contact
May cause irritation.

Eye contact
May cause irritation.

Indication of immediate medical attention and special treatment need

Notes for the doctor
Treat symptomatically.

5 – Fire-fighting measure
Extinguishing media

Suitable extinguisher media
Dry chemical, carbon dioxide or water fog. Do not use water directly on the fire.

Unsuitable extinguisher media
No data available.

Special hazards arising from the substance of mixture

Specific hazards
Oils in contact with porous materials, including rags, trash, vessel and piping insulation, when stored in confined space may spontaneously combust. Rags soaked with any solvent present a fire hazard and should always be stored in UL listed or Factory Mutual approved covered containers.

Hazardous combustion products
Thermal decomposition or combustion may liberate carbon oxides and other toxic gases or vapors.

Advice for firefighters

Protective actions during firefighting
Avoid breathing fire gases or vapors. Evacuate area. Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk. Avoid discharge to the aquatic environment. Control runoff water by containing and keeping it out of sewers and watercourses. If the risk of water pollution occurs, notify appropriate authorities.

Special protective equipment for firefighting
Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing. Standard Firefighter's clothing including helmets, protective boots, and gloves provide a basic level of protection for chemical incidents.

6 - Accidental release measures

Personal precautions, protective equipment, and emergency procedures

Personal Precautions
Wear protective clothing as described in Section 8 of this safety data sheet. No action shall be taken without appropriate training or involving any personal risk. Do not touch or walk into the spilled material.

Environmental precautions

Environmental precautions
Prevent further leakage or spillage if safe to do so. Do not let product enter drains.

Methods and materials for containment and cleanup

Methods for cleaning
SDS: Used cooking oil fatty acid glycerol formal esters (and) used cooking oil fatty acid methyl esters

Contain and remove the spillage, soaking up the residue with non-flammable absorbent. Place in an adequate container for immediate disposal. Eliminate sources of ignition. For waste disposal see Section 13.

Reference to other sections

For personal protection see Section 8. See Section 11 for additional information on health hazards. See Section 12 for additional information on ecological hazards. For disposal see section 13.

7 – Handling and storage

Precautions for safe handling

Usage precautions

As a TSCA-exempt R&D substance, this product must be used by or directly under the supervision of a technically qualified individual(s) as defined by TSCA. For handling, wear protective clothing as described in Section 8 of this safety data sheet. Keep away from food, drink, and animal feeding stuff. Keep container tightly sealed when not in use. Avoid discharge to the aquatic environment. Do not handle until all safety precautions have been read and understood. Do not handle broken packages without protective equipment. Do not reuse empty containers. For precautions see Section 2.

Advice on general occupational hygiene

Promptly wash if in contact with skin. Take off contaminated clothing and wash before reuse. Wash contaminated clothing before reuse.

Conditions for safe storage, including any Incompatibilities

Storage precautions

Store away from incompatible materials (see Section 10). Keep only in the original container. Keep container tightly closed, in a cool, well-ventilated place. Keep containers upright. Protect containers from damage. Keep in a fresh and dry place, avoiding direct sunlight. Keep container tightly sealed, in a fireproof place.

Storage class

Miscellaneous hazardous material storage. Preferably in a well-ventilated solvent cabinet.

Specific end uses

The identified uses for this product are in Section 1.

8 – Exposure controls/personal protection

Control parameters

Occupational exposure limits:
Mixture containing no substances with occupational exposure limit values.

**Protective equipment**

**Engineering control measures**

Use local exhaust ventilation, or other engineering controls to maintain airborne levels below exposure limit requirements or guidelines. If there are no applicable exposure limit requirements or guidelines, general ventilation should be sufficient for most operations. Local exhaust ventilation may be necessary for some operations.

**Eye/Face protection**

Wear safety glasses with side-shields.

**Hand protection**

Avoid skin contact. Wear protective clothes and solvent resistant gloves (nitrile).

**Other skin and body protection**

Use engineering controls to reduce air contamination to permissible exposure level. Wear appropriate clothing to prevent any possibility of liquid contact and repeated or prolonged vapor contact.

**Hygiene measures**

Wash after use and before eating, smoking and using the toilet. Do not eat, drink or smoke when using this product.

**Respiratory protection**

Where risk assessment shows air-purifying respirators are appropriate use a full-face respirator with a multi-purpose combination (US) or type ABEK (EN 14387) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

**Environmental exposure**

Avoid discharging to drains.

## 10 – Stability and reactivity

- **Chemical stability**: Stable under normal storage conditions.
- **Possibility of hazardous reactions**: Hazardous polymerization do not occur under normal conditions.
- **Conditions to avoid**: Excess heat. Ignition sources.
- **Hazardous decomposition products**: No data available.

## 11 – Toxicological information

- **Acute toxicity - oral**: >5,000
- **Acute toxicity - oral (LD50, mg/kg)**: Rat (EPA-T.E.S.T. Estimation)
- **Notes (oral LD50)**: Based on available data the classification criteria are not met.
### Acute toxicity – dermal

**Acute toxicity – dermal (LD50,mg/kg)**  
No data available.

**Notes (Dermal LD50)**  
Based on available data the classification criteria are not met.

### Acute toxicity – inhalation

**Acute toxicity – inhalation (LC50,dust/mist mg/l)**  
No data available.

**Notes (Inhalation LD50)**  
Based on available data the classification criteria are not met.

### Skin corrosion/irritation

**Result**  
May cause mild irritation.

### Serious eye damage/irritation

**Result**  
May cause mild irritation.

### Respiratory sensitization

**Result**  
Based on available data the classification criteria are not met.

### Skin sensitization

**Result**  
No data available.

### Germ cell mutagenicity

Based on available data the classification criteria are not met.

### Genotoxicity – in vitro

Based on available data the classification criteria are not met.

### Carcinogenicity

**IARC**  
This product does not contain 0.1% or more of the known or potential carcinogens listed in IARC.

**ACGIH**  
This product does not contain 0.1% or more of the known or potential carcinogens listed in ACGIH.

**NTP**  
This product does not contain 0.1% or more of the known or potential carcinogens listed in NTP.

**OSHA**  
This product does not contain 0.1% or more of the known or potential carcinogens listed in OSHA.

### Reproductive toxicity

**Fertility**  
Based on available data the classification criteria are not met.

**Development**  
Based on available data the classification criteria are not met.

### Specific target organ toxicity

**STOT-single exposure**  
No data available.

**STOT-repeated exposure**  
No data available.

### Additional information

**General information**  
This product is not classified as hazardous.
## Inhalation
Vapors or mists may irritate: mucous membranes. May cause: dizziness. Nausea.

## Ingestion
No hazard expected under normal use.

## Skin contact
May cause mild irritation.

## Eye contact
May cause mild irritation.

## Route of entry
Ingestion, Inhalation, skin and/or eye contact.

## Target organs
Not specific target organ known.

### 12 – Ecological information

#### Toxicity

**Ecotoxicity**
Not regarded as dangerous for the environment. However, large or frequent spills may have dangerous effects on the environment.

**Acute toxicity**

- **Toxicity to fish**
  No data available.

- **Aquatic invertebrates**
  No data available.

- **Aquatic plants**
  No data available.

**Chronic toxicity**

- **Toxicity to fish**
  No data available.

- **Aquatic invertebrates**
  No data available.

- **Aquatic plants**
  No data available.

**Persistency and biodegradability**

- **Persistency and biodegradability**
  Expected to biodegrade under both aerobic and anaerobic conditions.

**Result:**
Readily biodegradable. (EPI Suite estimation).

**Biodegradation**
Insoluble in water. It may persist in the environment.
Biological oxygen demand (mg/g)  No data available.

Chemical oxygen demand (mg/g)  No data available.

BOD/COD ratio  No data available.

Bioaccumulative potential  Unlikely to bioaccumulate (BCF<500).

Mobility in soil  Is not likely mobile due its low water solubility.

Results of PBT and vPvB  No data available.

Other adverse effects  No data available.

### 13 – Disposal considerations

**Waste treatment methods**

**General information**

The generation of waste should be minimized or avoided wherever possible. Reuse or recycle products wherever possible. This material and its container must be disposed of safely. When handling waste, the safety precautions applying to the handling of the product should be considered. Care should be taken when handling emptied containers that have not been thoroughly cleaned or rinsed out. Empty containers or liners may retain some product residues.

**Disposal methods**

Do not empty into drains. Dispose of surplus products and those that cannot be recycled via a licensed waste disposal contractor. Waste, residues, empty containers, discarded work clothes and contaminated cleaning materials should be collected in designated containers, labeled with their contents. Incineration and landfill should only be considered when recycling is not feasible.

### 14 – Transport information

**DOT (US)**  Not regulated by the DOT.

**IMDG**  Not regulated.

**IATA**  Not regulated.

**Transport in bulk according to**  Annex II of MARPOL 73/78, and the IBC Code

Not applicable.
15 – Regulatory information

US Federal Regulations and state regulations

Components of the product are listed in the quoted regulations. For details, please refer to the regulations directly. This list is not exhaustive; please check for other applicable regulations.

This product has been classified by hazard criteria of the Controlled Products Regulations, and the SDS contains all the information required by the Controlled Products Regulations.

US Federal Regulations

SARA 302 Section 302 (Specific toxic chemical listings)
No chemicals in this material are subject to the reporting requirements of SARA Title III, Section 302.

SARA Section 311/312 (Specific toxic chemical listings)
None of the ingredients are listed.

SARA Section 313 (Specific toxic chemical listings)
This material does not contain any chemical components with known CAS numbers that exceed the threshold (De Minimis) reporting levels established by SARA Title III, Section 313.

RCRA (hazardous waste code)
None of the ingredients are listed.

TSCA (Toxic Substances Control Act)
Not TSCA listed. This product is TSCA certified for research and development uses only.

CERCLA (Comprehensive Environmental Response, Compensation, and Liability Act)
None of the ingredients are listed.

US State Regulations

Proposition 65 (California)

Chemicals are known to cause cancer
None of the chemicals in this product are listed.

Chemicals are known to cause reproductive toxicity for females
None of the chemicals in this product are listed.

Chemicals are known to cause reproductive toxicity for males
None of the chemicals in this product are listed.

16 – Other information

Full text of H-Statements referred to under sections 2 and 3

H316 Causes mild skin irritation.
H320 Causes eye irritation.

GHS Column Model 2017 Classification

Acute health hazards (single exp) Negligible
Further Information

The information above is believed to be accurate and represents the best information available. However, we make no warranty of merchantability or any other warranty, express or implied, on such information and we assume no liability resulting from its use. Users should make their investigations to determine the suitability of the information for their purposes. In no event shall the InKemia Green Chemicals, Inc. be liable for any claims, losses or damages of any third party or for lost profits or any special, indirect, incidental, consequential or exemplary damages arising, even if the InKemia Green Chemicals, Inc. has been advised of the possibility of such damages.
