

Why EnviroLeather™?

Our Enviroleather fabrics are soft, stain-resistant and super easy to clean with just soap and water. This leather-like fabric exhibits commercial grade durability and is resistant to peeling, cracking and delamination. Enviroleather is designed to have minimal impact on the environment and to limit people's exposure to harmful toxins. No PVC or Plasticizers, no flame retardants, PFC-free and no formaldehyde. It passes indoor air quality testing (CAL 01350)

CONTENT: 55% TPE, 35% Polyester, 10% Cotton. REACH Certified.

Environmental & Health Safety Benefits

Our thermoplastic elastomer (TPE) formulation is designed to have minimal impact on the environment and to limit people's exposure to harmful toxins.

- PVC-Free, no plasticizers, phthalate-free
- Passes CAL 01350, low VOC emissions
- No perfluorochemicals (PFC-Free)
- No flame retardants, bromine-free
- No heavy metals
- Includes recycled and renewable content
- Animal friendly

Durability & Performance

Our TPE formulation is designed to be comfortable, soft and supple and to last a long time in commercial applications.

- Outstanding Puncture Resistance
- Resists cracking, peeling, and delamination
- Superior chemical resistance
- Stain resistant, easy to clean and disinfect
- Resists sagging and wrinkling to maintain tight, tailored look
- Outstanding seam abrasion resistance and durability
- Does not support microbial growth when cleaned properly
- Designed for comfort
- Over 100,000 double-rubs

Looks Good, Feels Good

EnviroLeather™ looks, feels, and breathes like leather. It is designed to dissipate heat and sweat for greater comfort.

Great aesthetics, combined with environmental benefits and superior performance characteristics make EnviroLeather™ the best choice for your upholstery fabric specifications.

Disinfecting/Cleaning Information

EnviroLeather™ utilizes a high tech polymer that results in excellent chemical resistance and cleanability. The product is inherently more stain resistant than vinyl.

To clean most stains use a dry cloth, or soap and water. Spot clean when necessary as soon as a spill occurs. For more intense stains you can use a diluted bleach solution on the EnviroLeather™.
