A non-toxic easy to use Jewelry cleaning system made using natural ingredients, suitable for all Jewelry both fashion and fine. Guaranteed to bring your Jewelry back to life, using a blend of banana and coconut oils, the solution brings sparkle back to gems and plated Jewelry.

Directions for use: Soak - Remove - Rinse - Wipe dry with cloth.

Use the jewelry cleaner full strength, no mixing required. Place jewelry to be cleaned into solution, allow to soak, soaking time will vary according to your type of jewelry. See appropriate care instructions for the type of jewelry that you are cleaning.

Helpful Ideas: Our Jewelry cleaner can be reused again and again, use soft bristled brush on stubborn buildup, the jewelry cleaner may be used in any ultrasonic cleaning machine.

Precious & Semi-Precious Gemstones

Diamonds - Rubies - Emeralds - Sapphires - Amethyst
Tanzanite - Topaz - Garnet - Peridot - Tourmaline

The above types of gemstones are generally mounted into a setting of gold, silver or platinum bands or chains. If the type of gemstone you are cleaning is found in the list above, you may soak in the cleaner overnight for maximum cleaning results.

Opals and Pearls

Opals and pearls require special attention, we suggest soaking for a short amount of time not to exceed 5 minutes.

Soft Gemstones

Coral - Jade - Turquoise - Lapis - Tiger's Eye - Onyx- Moon Stone

The above types of gemstones are generally mounted into a setting of gold, silver or platinum bands or chains. If the type of gemstone you are cleaning is found in the list above, you may soak in the cleaner for short periods of time, not to exceed 10 minutes.

Costume Jewelry and Fashion Jewelry

The above would be plated metals, synthetic stones, painted or enamel surfaces and plastics. The above types of jewelry are typically manufactured with use of glues, dyes and paint, although our cleaner is very gentle and safe for the above, we recommend that these types of jewelry be cleaned by hand and not allowed to soak.

Antique Jewelry

Antique jewelry is typically known as an older piece of jewelry, it may consist of any combination of gemstones, synthetic stones, plastics or metals, although our cleaner is very gentle and safe for the above, we recommend that these types of jewelry be cleaned by hand and not allowed to soak.

Chains Bracelets and Metals

Our jewelry cleaner is safe and gentle on all metals. The above types of jewelry may be allowed to soak overnight.

Scratched or Tarnished Metals

Our jewelry cleaner is not a scratch or tarnish remover, use enclosed Gold & Silver Polishing Cloths or Paste, to remove scratches & tarnish from metals, then follow by cleaning with the jewelry cleaner.

Watches

If the watch is waterproof, submerge in cleaner and allow to soak, if not waterproof, soak band only, use soft bristle brush to assist.

Glasses, Sunglasses & DVDs

Our jewelry cleaner is safe and gentle on all types of glasses and plastics. To use, submerge glasses into cleaner and allow to soak for 5 minutes, for daily cleaning of lenses or to clean DVDs, apply cleaner with fingers, rinse with water and dry with soft cloth.
