

MOUNTAIN

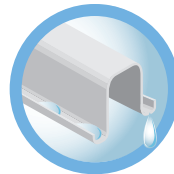

1200 SERIES

**SUPERIOR
HEIGHT**

The peaked arch of the 1200 MT Series provides the growing height necessary for taller crops, accommodates benching and creates constant climate efficiencies.

**ROLL-FORM
STRENGTH**

Built from Conley's 9 1/2" Rollformed hat section, the 1200 MT Series uses the same materials found in our largest spanning commercial greenhouses. The Rollformed arches are 438% stronger than traditional 1 3/8" 16 gauge round tubing.

NATURAL

Efficient roll-up sidewalls and an optional roof vent allow the 1200 MT series to ventilate naturally. This helps heat to escape while still capturing maximum sunlight.

The 1200 MT Series is a complete growing structure

Standard Options Include:

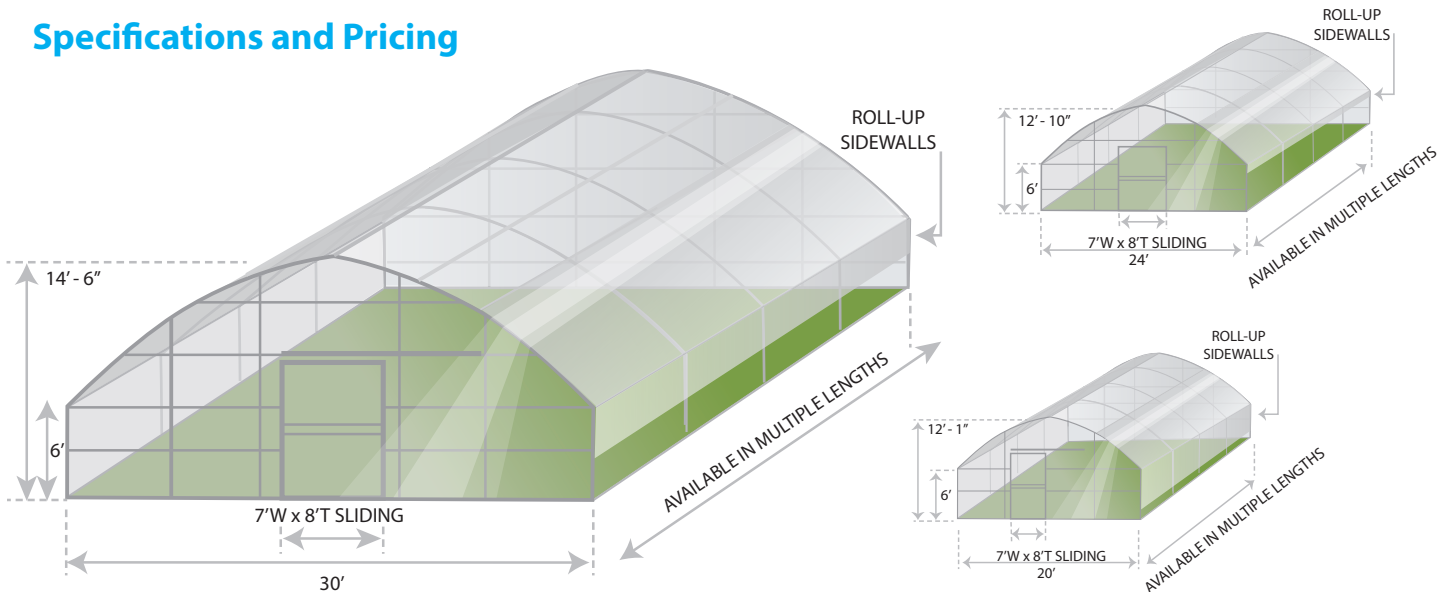

- Galvanized Steel Rollformed frame with 6' column spacing
- 6' sidewalls with strut protected manual roll-up curtains
- End wall frames covered in opal Corrugated Polycarbonate
- Roof covered in EnviroSolar 142 Woven Poly Film
- Large 7' Double sliding door
- Optional roof ridge vent
