

Conley's Superstar Series 3600 represents of the real "workhorses" within Conley's line of poly-covered roof greenhouses.

Main Features:

- Superior ROLL-FORM trusses, purlins and gutters ensure unmatched structural integrity
- Large, easy-to-walk-in gutters are lapped one into the other and cantilevered for increased strength
- 6' arch spacing virtually eliminates structural damage possible with rain and snow
- Arch to gutter adapters connect to the bottom of the gutter for optimum weight distribution
- Aluminum end wall combination creates a flashing for end wall and roof coverings
- Arch and purlin design offers "I" beam technology for superior strength
- Components are shipped pre-punched and cut to length; simplifying the installation
- ROLL-FORM components nest one into the other during shipment, substantially reducing freights costs

Loading

This structure is engineered to meet a standard 12 LB live load 85 mph wind or 30 LB ground snow 85 mph wind per the International Building Code (IBC). Alternative loadings are available upon request.

Incorporating 3" tall ROLL-FORM arch assemblies, this greenhouse is as equally comfortable in warmer regions as it is in extreme snow and wind climates.

Utilize the Superstar Series 3600 in conjunction with Conley's ridge vents to create one of the more optimum environments your plants may ever thrive in.
