

ADBLUE FILTER 3D HOUSING AND ELEMENT

The Piusi 3D AdBlue™ Filter is specifically designed for removing debris and crystallisation from AdBlue™. Whilst AdBlue™ is a pure solution, contamination can occur during the filling and transferring process, which can damage the vehicle's SCR system. An AdBlue™ filter is therefore important to prevent damage to your vehicle and keep it within warranty.

This model has a highly efficient technopolymer filtering element within a protective polyamide casing, and has 1" BSP fittings for easy connection to the installation.

Please note: It is recommended that the AdBlue™ filter is changed once a year.

FEATURES:

- 70 micron particle filter.
- Maximum flow rate of 40lpm.
- For use with AdBlue™.
- 1" M BSP inlet/outlet.
- Protective polyamide casing.

PRODUCT RANGE:

Code	Description
F00611D00	PIUSI Adblue Filter 3D Housing
F00611D10	PIUSI Adblue Filter 3D Replacement Element
