

AVIATION HOSE SWIVELS

38mm (1 1/2")

Item code: PAHS-TS57-0058

PETRO Industrial's aviation Hose Swivels are design to provide a smooth swivel action between the nozzle and hose, providing ease of delivery. They are typically used on overwing nozzles (i.e. the Liquip AVN040 / 042 overwing nozzles) and have a nickel-plated brass construction.

All threads are BSPP with a connection size of 38mm (1 1/2"), however other sizes are available upon request.

PLEASE NOTE:

A stainless steel version is available upon special request, please enquire for pricing.
