

K44 MECHANICAL METER

Item code: METER-000560000-CATA

The Piusi K44 mechanical fuel flow meter measures the exact quantity of the dispensed diesel fuel or oil through a nutating disk system. The K44 fuel flow meter measures up to 9999.9 litres, and is reliable, inexpensive, and easy to install.

Thanks to their reduced flow resistance, these Piusi diesel and oil flow meters can also perform well under gravity flow conditions. There are separate models available specifically for diesel fuel and oil.

FEATURES:

- Oil and diesel flow meter.
- Flow rate: 20-120lpm.
- Measures up to 9999.9 litres at a time.
- Also compatible with gravity fed systems.
- Can be rotated to allow flow from 4 directions.
- 25mm (1") F x F BSP Inlet/Outlet.
- Nutating disk system.
- Accuracy +/-1% after calibration.
- 4 digit resettable partial totals.
- 7 digit non-resettable totaliser.
- **OPTION:** Pulse Output Open collector card type. Frequency 10 pulses/litre, power supply 6-24 V DC, max 10 mA. Code: 00056500A-CATA.
