PIUSI

MANUAL NOZZLE ULP (GASOLINE)

Item code: NOZZLE-00065001A-CATA

The Piusi Self 3000 is manufactured with a resistant aluminum body enclosed in a anti-shock plastic shell that increases the nozzle's ease of handling by making the grip comfortable even when used at low temperatures.

The nozzle's integrated swivel connector, and the hammer-free valve inside it, guarantee a high degree of safety. Its low loss of head, given the conformation of the valve, allow it to function at high flow rates.

Thanks to the reduced force necessary to open the valve, the Self 3000 nozzle can be used for the transfer of fuels and oils with working pressures up to 10 bars (142 psi).

FEATURES:

- Manual Shut Off Nozzle Design.
- Petrol (Gasoline) Spout.
- Flow Rate is up to 40 Gpm (150 Lpm).
- Inlet: 1 inch (DN25) BSP - option for NPT (National Pipe Thread) - inlet .
- Housing: Aluminum enclosed in anti-shock plastic shell.
- Removable lever protection prevent accidental dispensing.
- Transfer oils and fuels with working pressures up to 10 bar (142 psi).
