PIUSI

K500 PRESET ELECTRONIC OIL NOZZLE

Item code: NOZZLE-F00687210-CATA

The Piusi K500 Preset Oil Nozzle is designed to perform the pre-selected dispensing of oil through use of its automatic spout. Using this spout, the meter incorporated in the nozzle, automatically closes the valve when the pre-selected quantity has been dispensed.

These Piusi oil nozzles have a trigger protection to prevent accidental operation outside of the pre-select dispense, and a pressure moulded body that is resistant to high pressures.

FEATURES:

- Flow rate: 1 - 30 lpm.
- Accuracy: +/- 0.5 %.
- Repeatability: 0.2 %.
- Viscosity: 5 - 2000 cSt.
- Max. pressure: 70 bar / 994 psi.
- Min. presettable quantity 0.1 litres, max. 99.9 litres.
- Indication of the quantity dispensed with diver - if unit of measurement.

High protection

Battery compartment

Preset quantity

75° tilt up and down

K500 with Auto non-drip Valve

Meter with Oval Gears.
