

DRUM CONNECTOR

Comes with Filter & Valve

Item code: F17163000

The Piusi Drum Connector Filters are ideal for the quick and safe connection of a pump to a drum or tank.

The integrated filter is easy to inspect and ensures that debris and large particles do not enter the pumping system and contaminate the fuel that is being dispensed.

Thanks to their flanged connection, all Piusi pumps can be easily connected without the need for sealing pastes or Teflon.
