

OIL & FUEL SPILL KIT ECONOMY PLUS 135L

Item code: SKHGP135

Designed for cleaning up oil, fuel, diesel, petrol, solvents and other petroleum products. Ideal for unsealed areas around mine sites, drilling rigs and truck stops. Its components have been designed for harsh conditions.

FEATURES:

- Contains Global Peat floorsweep and polypropylene oil and fuel-only maintenance absorbents.
- Clean non-allergenic, non-hazardous absorbents, with little or no dust.
- A Global audit tag is included and when fitted will readily identify when the kit has been accessed or used.
- Oil and fuel spill kit includes labels, laminated re-order form and operating instructions.
- UV-stabilized and colour-coded labels are fitted to the front and sides of the wheelie bin.
- Spill kit can be customized by adding/removing/wapping components.
- The front label identifies the type of spill kit and liquids absorbed, whilst the two side labels provide clear and concise emergency response instructions.
- Spill kit can be converted to a Pollution Control Station with accessories such as shovels (long-handled or non-sparking), wall mounted signs, bassine brooms, bin covers, squeegees, bin locks or rakes.
- Spill kit is supplied in a yellow 120 litre wheelie bin. (A choice of colour is also available to suit individual requirements.
- Shipping Weight: 29kg.
- Dimensions: 55cm x 50cm x 90cm.
