TEST MEASURE CAN 20L WITH CASE

Item code: TM20ACWM-CATA

Provides a true comparison for checking the accuracy of fuel dispensing equipment.

FEATURES:

- Suitable for use with most fluids including Diesel, Petrol & Diesel Exhaust Fluid - (AdBlue®).
- Varigauge neck allows the amount of over or under measure to be easily read in millilitres. 20 litres capacity, 304 stainless steel construction.
- Separate lift & emptying handles.
- Supplied c/w steel carrying case.
- Weights & measures (W/M) certificate.

HOW TO USE:

1. The capacity of the test measure at the "0" mark on the calibrated scale is 20 litres.
2. Filling the measure to this mark from a fuel dispenser will ensure 20 litres of fuel has been dispensed and calibration can be performed accordingly.
3. Ensure the measure has been drained for at least 1 minute prior to filling.
4. If the measure is to be used to calibrate a Diesel Exhaust Fluid (Adblue®) dispenser ensure that it has not been used previously to calibrate a dispenser with any other liquid.
