

VALVE PRESSURE REGULATOR

664-302 40NB SCR BSP

Item code: 664-302

PETRO's Model 664 Pressure Regulator Valve was designed to be used in conjunction with suction type dispensers connected to an aboveground storage tank. The pressure regulator valve prevents fuel from flowing to the pumping unit and flowing out the vent tube of the self-contained dispenser when the pump is not activated.

The pressure regulator valve is a vacuum actuated valve which will not allow product flow until the suction of the pumping unit opens the valve allowing the product to flow to the dispenser. The valve will close by means of an internal spring when pumping is completed.

FEATURES:

- Hydrostatic pressure adjusting mechanism with durable weather cap.
- Built in thermal expansion pressure relief valve.
- Shear section is standard, eliminating need for an additional shear valve.
- NFPA 30.
- API/RP 2000.

Materials

- Body: cast iron.
- Seals: fluorocarbon.
- Filter: stainless steel.
- Poppet: fluorocarbon.

ORDERING INFO:

Code	Description	Weight	
		Lbs	Kg
66430201	Male-NPT	19.00	8.62
66430202	Union	19.30	8.75
66430203	Female-NPT	19.00	8.62
66430206	Female-Poppeted	19.00	8.62
66430226	Female-BSPT	19.00	8.62
66222001	Male replacement adapter		
66421101	Female replacement adapter for 664-302-06		
66430401	Mounting bracket
