

# The Money Saving Business Solution!

Track, Watch and Manage **ALL Transactions** in **Real-time** on your own version of our Secure **iPETRO Pro Cloud Website** using a PC, tablet or smartphone.

**Total control** of single or multiple home depot fuelling locations, real-time reports, updates and alerts at your finger tips.

### Why Choose PETRO?

#### **Cut Your Fuel Costs**

It's never been so easy to monitor the fuel costs of your business - total efficiency and piece of mind.

#### **Monitor Every Litre**

Total awareness of every litre of fuel delivered, pumped and consumed.

#### **Save Money**

Improve your fleets performance using real-time vehicle and driver statistical reports.

#### **Greater Control**

24/7 access to your depot stocks and fuelling systems - reduce stock losses.

### How iPETRO works...

Driver gains access to fuelling by using fuel card, tag and/or 4 digit pin. This is followed by the entry of vehicle/driver details.

These prompts are fully customisable to fit any customer requirements.

See graphic instructions that follows.

Fuel delivery, transaction data, tank readings.

RS232 & RS485

Using an RS232 or RS485 interface you can connect a tank gauge to enable automatic **real-time** tank readings.

New card data, fuel limit changes, new pin number, cancelled cards

3

View your fleets data via the **iPETRO Pro Cloud** Website, track multiple sites and onroad transactions on one screen.

**iPETRO Pro Cloud Integration:** On-Road Fuel Card Transactions.

2

Transaction and stock info automatically uploaded to iPETRO Pro Cloud in realtime. Card and setup changes automatically downloaded to the terminal.

### More iPETRO details...

#### **Complete Control at your fingertips**

iPETRO Pro Cloud is the complete fuel management package, stock control, depot transactions, vehicle and mileage capture & onroad fuelling data accessible from any web enabled PC, tablet or smart phone.

Communicating in real-time with the **iPETRO** Terminal you can be assured of accurate and to the second feedback on your fleets movements.

Reports are completely customisable and are available to view in over 50 different formats and can be automatically generated and delivered to the inboxes of multiple recipients.

**Printed Reports** 

**Excel Format** CSV Format

#### **Real-time Updates**

"Ensure your fuel reserves never run low by setting re-order levels on multiple tanks - emails are automatically generated to inform both the fleet manager and fuel supplier a delivery is required."

# Real-time & Automated Operations

Customised & Convenient... save time with iPETRO Pro Cloud's real-time automated operations.

Setup customised reports bespoke to your fleet or even departments within your company. Automate reports to run and send directly to multiple recipients at a chosen date and time.

Utilise fuel gauges to monitor tanks levels and send automatic re-order emails to your fuel company. Unexpected drops in fuel levels - set an alert straight to your inbox, iPETRO Pro Cloud covers every eventuality for any type of business.

**iPETRO Pro Cloud** offer a fully bespoke system allowing imports and exports on hourly and daily basis over FTP (e.g. fuel cards).

If your fleet has a requirement **iPETRO Pro Cloud** can offer a solution.

### **OUPtime** Progressive Terminal Management

# Ensure your fuel and fluid management systems are working to their full potential.

The new UPtime hardware interface, now featured in all **iPETRO** Terminals (also available for existing **iPETRO** installations); provides users with a comprehensive suite of reports and tools to manage your terminals health and operation.

#### **Key benefits of UPtime:**

- Easy to use, highly responsive dashboard Viewable on all smart devices.
- Awareness of potential issues before they happen allowing you to save money on servicing and contract costs.
- Remote terminal reboot
- Enable and disable pumps remotely
- Remote service and installation
- Live notifications of offline terminals.
- Flash drive, battery life, power supply indicators
- Terminal 'Shock Alerts'
- Historical data archived to allow analysis of trends in maintenance, terminal behaviour and user operation.
