

iPETRO Link is a universal, integrated, live, linked communication device designed to transmit all data from ANY Fluid Management and Automatic Tank Gauging System to the iPETRO VMI Web Portal.

Discover the epitome of efficient **inventory management** with the iPETRO Link, an innovative solution combining cutting-edge hardware and

software within a user-friendly web portal.

This **advanced system** captures real-time data, encompassing tank levels, and temperatures while offering operators a comprehensive overview, customisable configuration options, seamless setup, and top-notch service for tank gauging systems.

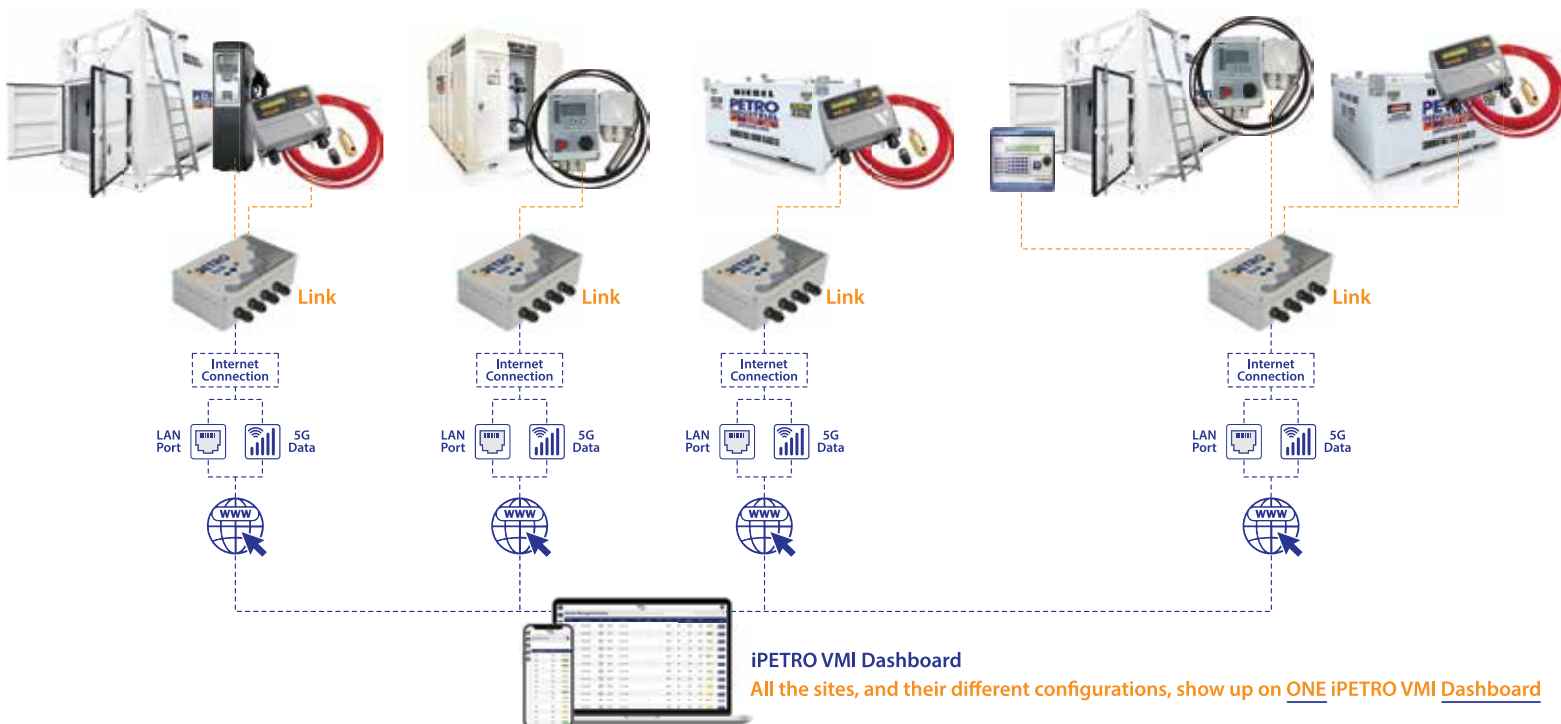

The **FLEXIBILITY** and **VERSATILITY** of the **iPETRO LINK**

SITE 1
WITH ONE FUEL TANK
A PIUSI BOWSER WITH FMS
AND AN OCIO TANK GAUGE

SITE 2
WITH ONE FUEL TANK
AND AN OLE TANK GAUGE

SITE 3
WITH ONE FUEL TANK
AND AN OCIO TANK GAUGE

SITE 4
WITH TWO FUEL TANKS
ONE TANK HAS AN IPETRO PRO AND AN OLE TANK GAUGE
AND THE OTHER TANK ONLY HAS AN OCIO TANK GAUGE

What sets the **iPETRO Link** apart is its **proactive monitoring capability**, which diligently identifies potential issues before they can escalate into significant challenges for your business.

This foresight not only streamlines the resolution process but also prevents any degradation in performance.

Ideal for locations with substantial liquid storage tanks, such as refineries, petrochemical industries, distribution terminals, and depots, the **iPETRO Link seamlessly integrates with existing management systems, whether they are OLE, OCIO, PIUSI, iPETRO, or other brands.**

This integration empowers you with complete control over all your sites or depots, regardless of your geographical location.

The iPETRO Link introduces an automated **email alert** system and **robust reporting** capabilities, ensuring you stay informed about **low fuel levels** in any of your tanks. This proactive approach extends beyond your organisation, as *the system can automatically notify fuel suppliers about impending shortages*, guaranteeing smooth and uninterrupted operations.

As part of the iPETRO ecosystem, the iPETRO Link, along with the full iPETRO Suite (including iPETRO Pro and iPETRO Lite), **seamlessly integrates** with the iPETRO VMI (Vendor Management Inventory) Web Dashboard. Experience the convenience of **managing all your sites and systems on a single, intuitive dashboard with a unified login** for enhanced efficiency.

Connectivity is a breeze – simply link the iPETRO Link to the internet via the LAN port or 5G data. All you need is a web-enabled device to access your iPETRO VMI account, offering unparalleled convenience and accessibility in overseeing your inventory management.

Elevate your operations with iPETRO Link – where innovation meets efficiency.

FEATURES:

- Automatic API push notification in the scheduling system,
- GPS Location,
- Modem or LAN,
- Connect multiple ATG,
- Multiple directly connected probes with temperature-corrected volume,
- Low voltage – no need for an electrician to service,
- Opening and closing daily balance,
- Alerts by Text message and Email,
- Scan the QR code for tank statistics. Ullage, volume, temperature,
- Options,
- Fuel Quality Sensor,
- Satellite connection,
- Environmental Sensors.

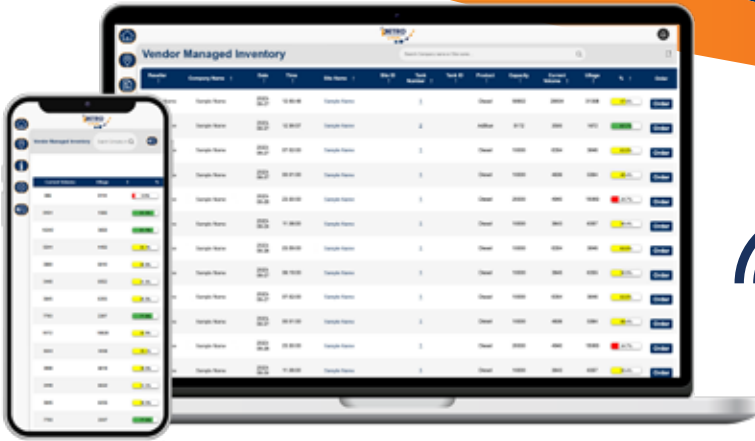

Devices the link can communicate with:

- MODBUS
- OCIO1
- OLE
- Veeder Root
- Franklin Fueling
- Gilbarco TLS
- MQTT protocol for standard IoT messaging
- CAN Bus

Supported connectivity:

Upon request, one built-in LAN port can be added to support WiFi Access Point.

iPETRO Link can be directly connected to a network switch port as well as a Satellite Connection via a third party – 4G/5G mobile data modems.

iPETRO VMI – Integrated, Cloud Based, Data Measuring Dashboard for Multiple Sites and Management Systems on ONE Central Portal.

Experience Effortless Fuel Inventory Management with the exclusive iPETRO **V**endor **M**anagement Inventory Dashboard (VMI).

The iPETRO VMI dashboard offers the perfect solution where **ALL** fuel management, and tank gauging systems from multiple sites and portals can be managed on one dashboard, with only ONE Login. All you need is a web-enabled device to connect to the internet to access your iPETRO VMI account.

VENDOR MANAGEMENT INVENTORY

PORTAL DASHBOARD

iPETRO Pro

iPETRO Lite

iPETRO Link

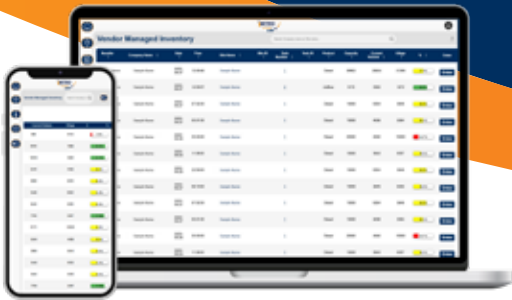

iPETRO VMI is a secure web-based portal for complete management of home depot and home depot networks, allowing on-line, real-time transaction and stock management over defined ranges.

With iPETRO VMI (Vendor Management Inventory), businesses can seamlessly integrate data from various sources, eliminating the need for manual data reconciliation and reducing errors.

The user-friendly interface and advanced features empower users to easily navigate and analyze vast amounts of data, providing actionable insights and improving decision-making processes.

Integrate your iPETRO Pro, iPETRO Lite, or iPETRO Link with the VMI dashboard.

No additional software is required!

Enhance your setup by combining the **iPETRO Link** with the **VMI dashboard**, and seamlessly integrate with your existing management systems, regardless if it is OLE, OCIO, PIUSI, iPETRO, or other brands. This integration empowers you with full control over all your sites or depots, regardless of your geographical location.

Moreover, our **automated email alert** system and **reporting capabilities** keep you informed about **low fuel levels** in any of your tanks, ensuring **proactive action**. Not only that, but *the system can also automatically notify your fuel suppliers about any impending fuel shortages*, ensuring smooth and uninterrupted operations.

Talk to our sales team about how we can customise the dashboard and reporting capabilities to enhance your business's reporting requirements.
