

The Next Generation of Entry Level
Fuel Management Solutions

www.petroind.com

What is iPETRO?

Introducing the next generation of entry level Fuel Management terminals, the **iPETRO** allows you to track every litre of fuel or fluid dispensed, utilising Contactless technology for secure and controlled fuelling.

“ iPETRO is a high capacity offline terminal with the ability for 2 pump, multi-product fuelling. ”

The **iPETRO** solution provides cost effective Fuel Management with vehicle/driver and stock reporting via the secure **iPETRO** website.

Our **iPETRO** website is a moneysaving business tool providing user friendly reporting and reconciliation.

What is iPETRO Litefueller?

Combined with the reliability and accuracy of the **iPETRO** Litefueller commercial pump, the **iPETRO** Lite is the complete entry level Fuel Management solution in one unit, Security, Control and Online Centralised Reporting.

The **iPETRO** Litefueller is a commercial, entry level heavy duty fuel pump accurate to $\pm 0.5\%$. It offers excellent performance and reliability for a cost effective solution.

The **iPETRO** Litefueller sets a new standard in the low cost pump market with its quality components and ability to provide high accuracy even at low speeds.

Why Choose iPETRO

With a number of alternative Fuel Management solutions on the market why choose **iPETRO**?

After studying the market and the functionality of our competitors alternative models, we are confident that the **iPETRO Solution** will provide the ease of use and flexibility to really make a difference to your business.

- No requirement to install additional PC software. Manage your fleet via the easy to use, online portal, on any computer.
- High capacity memory with space for over 4000 transactions and 250 users.
- Full QWERTY keyboard allowing for easy odometer and data entry.
- Centralised reporting allows the viewing of multiple sites under one screen. **iPETRO** is ideal for single or multi-site use.
- Clear and competitive pricing.

iPETRO is the
only 2 pump system in
the entry level market.

Improve the performance of your business with the **iPETRO Solution**

Cut your Fuel Costs

Track every litre of fuel or fluid dispensed.

Reduce Stock Losses

Increased awareness of outgoing and incoming stock in addition to tank leakage.

24/7 access to your depot stocks

Log into IPETRO for instant access to stock levels and driver statistics.

Greater Control & Security

Utilising Contactless technology to give secure and controlled fuelling.

For quick, convenient access to fuelling the **iPETRO Solution** utilises V-Tag technology allowing driver identification by means of a four digit pin, removing the requirement for a physical tag. V-Tag was developed due to popular demand from customers and distributors and is available as a software upgrade to new and existing terminals.

How it Works...

1 The driver gains fuel using either the contactless tag or by entering his 4-digit V-Tag Pin. This is followed by the entry of any registration/driver details which will allow fuelling to commence.

Using an RS232 or RS485 interface you can connect a tank gauge to enable automatic tank readings.

RS232 & RS485

2 The **iPETRO** USB Management stick is inserted into the **iPETRO** terminal. Transactions, new tag information and tank gauge reading will automatically synchronize.

3 Insert the **iPETRO** USB Management stick into any PC connected to the internet, the information from the terminal will transfer to the **iPETRO** Website.

Various Data can be synchronized between the **iPETRO** terminal and the **iPETRO** website:

- Transactions • Tag updates • Pin Codes
- Pump Settings • Terminal prompts.

4 **Centralised reporting**
View your fleets data via the **iPETRO** Website.
Track multiple sites under just one screen.

Key Features

Use V-Tags as an alternative to contactless tags. Identify by driver or vehicle by entering a four digit pin and remove the need for a physical tag.

iPETRO Lite

- Secure contactless technology to track every litre
- 2 Pump option available, perfect for Diesel and Adblue setups.
- Standard and backup memory with capacity for 4000+ transactions.
- Up to 250 users with contactless vehicle or driver tags
- Override switch available for manual fuelling
- Cost effective solution for small, medium or large fleets
- Now compatible with RS232 and RS485 interfaces for connection to tank gauge solutions

iPETRO combine to form a money-saving business tool providing user friendly reporting and reconciliation.

- No software installation necessary - Access the IPETRO portal from any pc, tablet or smartphone connected to the internet.
- 4 Simple screens for complete ease of use.
- Centralised reporting - View all sites under one screen.
- Stock reconciliation.
- Track fuel by vehicle or driver.
- Manager secure web portal for override facility.
- Exports to TSM Fleet Management website.

The Power of iPETRO

iPETRO offers user friendly transaction and stock information easily accessed by unlimited users, choose from various access levels to restrict individual staff or departments if required.

iPETRO can be accessed from any web enabled PC, tablet or smartphone. Replacing the requirement for software installed on only one PC.

Reports generated by iPETRO are available to view in a choice of formats:

Printed Reports

Excel Format

CSV Format

Customising iPETRO

You can choose to modify our existing formats to produce the layout of the report to suit your needs.

Change headings, remove fields and design your own CSV export by changing field details and lengths.

Rename the tag to a Fuel Card number, Vehicle Registration or Driver name. iPETRO is the flexible, easy to use solution leading the way in Entry Level Fuel Management Software.
