iPETRO Pro
FLUIDS MANAGEMENT

iPETRO Pro – market leader in Cloud-based Fuel Management solutions, offering the most cutting-edge solutions in automation and authentication.

The **iPETRO Pro FMS** is a fully cloud based system and requires no software on your local PC. All information is stored in the Cloud, in real-time, and not on the terminal.

Everything happens in Real-time – transaction data capture, data is saved, authentication and stock control.

All data are configurable remotely through any web enabled device. There are no hidden fees or "upgrades" required for the iPETRO Pro.

ADVANCED FEATURES:

- Compatible with all major pump suppliers including Compac, Transponder Technologies, Tokheim, Pumptronics, Gilbarco, Dresser Wayne and the iPETRO Refueller.
- Can interface with your tank gauge feed real time stock information to the cloud.
- All tags are programmed via the Pro Cloud website and are authenticated in real time to the cloud.
- Powerful reporting filters, that can be tailored to your specific business needs.
- Automate your pre-configured reports and receive your report via email or FTP.
- Automate further with our API, removing the need to handle any data manually.
- Tailor your authentication to your business requirements – see our Authentication Datasheet.
- Off-road transactions? Bring all your data together in one location with our import tools.
- Receive email alerts when Emergency Stops are activated.
- Remove the need for paper, email your receipt instead.

Extended Capabilities:

- Connect **iPETRO AVID** (Automatic Vehicle Identification & Authentication) to your iPETRO Pro Terminal.

- The iPETRO Pro Terminal connects to other **Remote Consoles** at more dispensing points/bowsers.
- Sell fuel with the addition of the **iPETRO Pay** capability.
