THE GARDEN SHOP

Lucky bamboo

Lucky bamboo is one of the most favorite plants inside houses and business places as it is believed to bring happiness and prosperity. It requires bright, ventilated areas and a temperatures range of 15°C to 22°C.

Bunny ear cacti

Bunny cacti are the perfect plant for the novice gardener.

They are also the perfect specimen for a idea gift.

Bunny ear cactus plant, also called angel's wings, has ease of care combined with an original appearance.

Peace lily

Spathiphyllum is named for its flamboyant white blooms, which resemble flags of peace. Happy peace lilies surrender constantly, producing bloom after bloom.

Chrysanthemum

Chrysanthemum is the winner when it comes to flowering plants that makes your face bloom. When cared for properly with adequate water and nutrients, these plants are the ideal happy therapy.

Succulents

Succulents are the micro mini happy pill for any gardener.

Planting them with loads and loads of love and giving them enough space, light and water is all it takes to relish these little beauties. They don't like to have wet feet but when you do water, water thoroughly.

Anthurium

All it takes is a glance for these heart shaped pretty little creatures to mesmories anyone. Shaddy light and heat, with adequate intervals of watering will get you dancing joys of red, yellow, green, pink and violet anthuriums.

Orchid

Orchids are a wonderful gift for every occasion. Orchids don't drink plenty of water. They are happy in shade and dry conditions. They take their own sweet little time to bloom and re-bloom, but when they do it is sure a sight.

Moon Cacti

Bright, pretty and colourful, these little cacti balls are pure bliss. They make sure to pull a smile out of you, everytime. Some sprinkling of water and mere sunlight is all they ask in return.

Syngonium green

Syngonium species are often grown as house plants.

Minimum temperature 16 °C to a maximum 30 °C.

They require high humidity, including misting the leaves regularly, and good light, but not direct sunlight; they will tolerate low light levels.

They require high humidity, including misting the leaves regularly, and good light, but not direct sunlight; they will tolerate low light levels.

Sansevieria

Sansevieria is an evergreen perennial plant forming dense stands, spreading by way of its creeping rhizome. It is commonly called "mother-in-law's tongue" or "snake plant", because of the shape and sharp margins of its leaves.

These plants can survive with very little water and bright day light.

Tillandsia

Tillandsia is a genus of around 650 species of evergreen, perennial flowering plants. They are also commonly known as Airplants because of their natural propensity to cling wherever conditions permit: telephone wires, tree branches, barks, bare rocks, etc. They need just a spray of water as they can absorb moisture from air to survive.

Ceylon Gold

For generations, philodendron ceylon golds have served as a mainstay in interior gardens. Put them in bright, but indirect sunlight and they are happy and green forever. Water only when the top soil is dry.

Aglonima Red

Grow red aglaonema in low, medium, or bright light. The plant often shows the best color in medium or indirect light indoors. In most areas, it can take some direct sun on the leaves, but in the Deep South, it's best to diffuse strong sun with a sheer curtain. Water red aglaonema when the soil dries out.

Chlorophytum

Also known as spider plant, these plants cover up your empty space easily being as bushy as possible. Spider plants prefer filtered sunlight, but can grow in part-shade to shade. They need water once the top soil gets dry.

Spanish moss

Spanish moss drinks up distilled or purified water. They can actually survive with out much of water as they absorb moisture from the surroundings.They tend to grown with ease, when left undisturbed.

Zamia

Make sure to keep them in well-drained soil and make sure to give them lots of light especially during the growing season in spring and when the plant is young. Fertilize twice a year, water sparingly, and your zamia can grow quite well either outdoors or as a houseplant.

Hoya Heart

Room temperatures should be maintained between 60 and 80 F. or 15 and 26 C.

With its fleshy, succulent leaves, sweetheart hoya is relatively drought tolerant and can get by with as little as one or two waterings per month. Water deeply when the soil is slightly dry to the touch, then let the pot drain thoroughly.

Jade

Jade plant care is easy and simple. Many people enjoy growing jade plants in their homes and offices, and they are considered to be symbols of good luck. One of the most important things when you care for jade plants is to make sure that they are watered properly.
