GEO FROST QUILT PATTERN

Geo Frost is a modern quilt designed to complement PBS Fabrics' Ice Dye collection by Kim Eichler-Messmer. The asymmetrical, geometric quilt layout accommodates large pieces of the organic designs to show off the beautiful patterns created through a physical ice dyeing process.

To get this modern aesthetic and asymmetrical design, the quilt is pieced together with a variety of non-traditional blocks. Each block is different and detailed cutting instructions are provided for each block.

Read the pattern through fully before starting the design and take care to piece the blocks in the instructed order to finish your quilt top.

NOTES

- 1/4" seams used throughout
- Press fabrics before cutting
- Calculations are made for 42" width of fabric
- BKG – background fabric

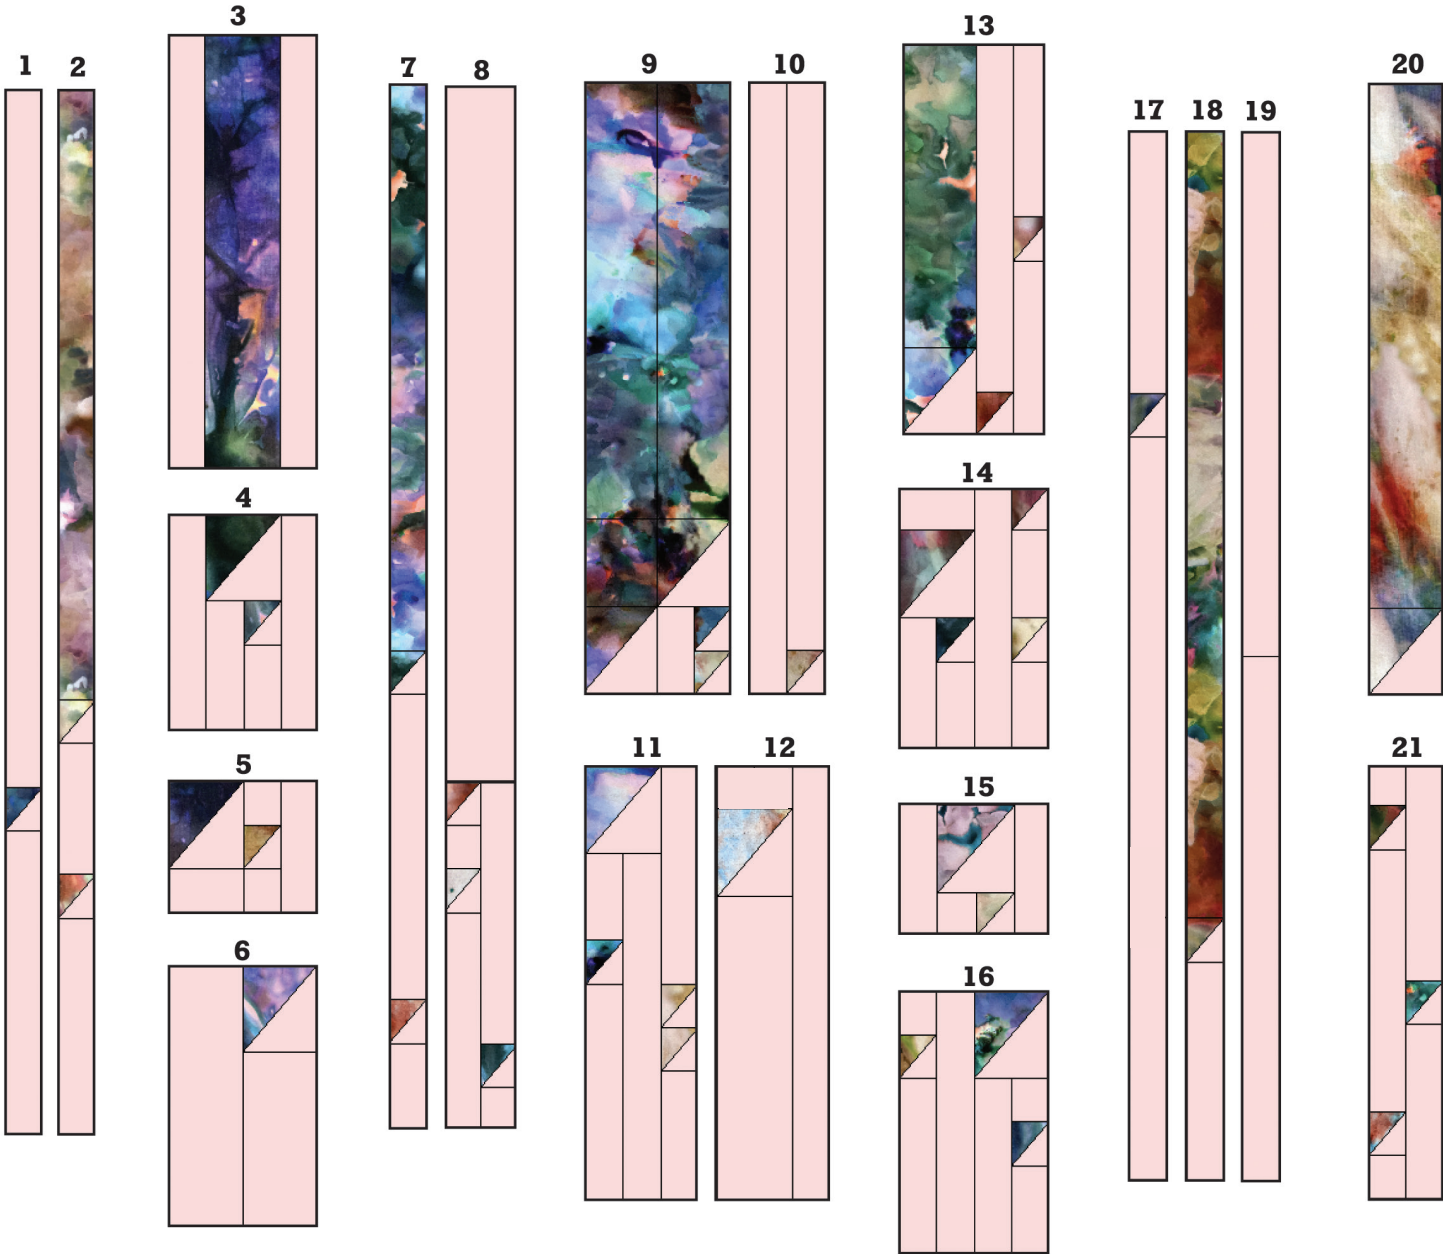
QUILT BLOCK DIAGRAM

FINISHED QUILT SIZE 36" X 42"



This quilt has 21 unique blocks to make up the asymmetrical design. It's suggested to make each block and piece together in strips to build the quilt top as you go.*

TIP: This diagram serves as a quick reference guide for each block. Print it out and keep it handy as you're working.

**There are detailed rotary cutting instructions for each block at the end of this pattern.*

HALF SQUARE TRIANGLES

There are a total of twenty-nine 1 1/2" HST and twelve 3" HST in the final design. You can cut these out in advance or cut them out as needed for each individual block based on your own preference. You will do this project in steps and might want to coordinate the HST fabric colors with each block.

12 – 3" HST

Beginning Square Size = 3 7/8"

29 – 1 1/2" HST

Beginning Square Size = 2 3/8"

HOW TO MAKE A HALF SQUARE TRIANGLE

STEP 1

Cut and place two squares of fabric right sides together. Draw a line diagonally from one corner to the opposite corner.

STEP 2

Sew 1/4" from either side of the line; backstitch at each end to secure the seams.

STEP 3

Cut along the drawn line, open fabric pieces and press.
