RING SIZING GUIDE

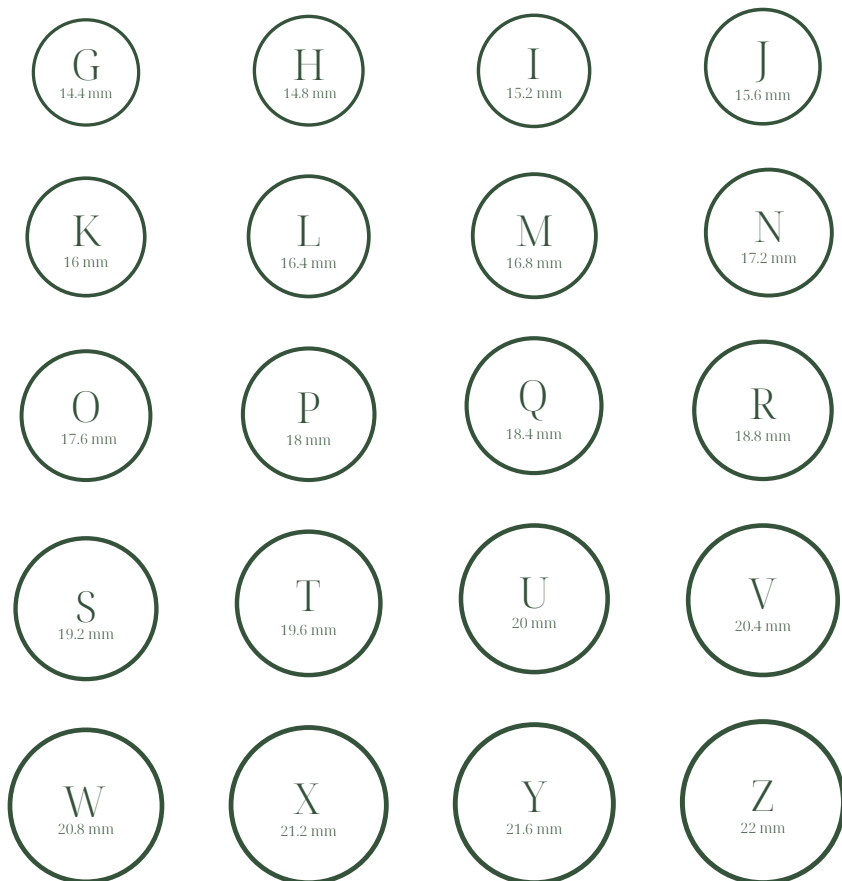

We work with the alphabetical sizing system, so the ring size you provide us will be a letter. The most accurate way to determine your ring size is to have it measured by a jeweller (you're always welcome to pop into our studio to have this done) but we understand this is not always possible so we've put together the below guide.

Please note that if you choose to measure your finger at home and the measurement is not correct, we cannot take responsibility for that and there may be additional sizing fees.

How to use our guide:

Place an existing ring that fits the wearer on the diagram below and make sure the inside diameter of the ring matches the circle. The letter inside the circle that matches the inner diameter of the ring is your ring size to provide us.

Please ensure you print this guide on an A4 page at 100% scaling. To test your print screen accuracy, make sure that this bar measures 50mm/5cm
