

CLENS-KIT

TANKLESS WATER HEATER DESCALING PROCEDURE...

The following steps outline a general procedure for using the **CLENS-KIT** to descale tankless water heaters. Your heater's manufacturer may have more specific instructions, which should be followed for descaling your particular appliance.

The **CLENS-KIT** was designed to be used in conjunction with tankless water heater isolation valves that provide 3/4" hot and cold drain connections. If these valves are not in place, the heater can be disconnected from the plumbing system and drained, and the **CLENS-KIT** hoses connected directly to the cold and hot water connections.

- 1 Disconnect the power to the water heater.
- 2 Close the hot and cold system isolation valves.
- 3 Ensure that the cold and hot drain valves are closed, and remove the drain caps.
- 4 Connect one of the hoses to the pump. Connect the other end of the same hoses to the cold drain valve.
- 5 Connect the other hose to the hot drain valve. Place the other end of the same hose into the bucket.
- 6 Pour entire contents of one 1/2 litre bottle of **EVERCLENS** Tankless Water Heater Descaler into the bucket.
- 7 Add approximately 2 gallons of water to the bucket – bucket should be about 3/4 full.
- 8 Open both the cold and hot drain valves.
- 9 Plug the pump into a grounded receptacle. The pump will turn on.
- 10 Circulate the **EVERCLENS** solution through the heater for 15-30 minutes.
- 11 Unplug the pump.
- 12 Close the cold drain valve, remove the hose and replace the drain cap.
- 13 Remove the pump from the bucket and discard the solution. Organic **EVERCLENS** is safe to dispose of in drains.
- 14 Flush the heater for several minutes by opening the cold system isolation valve and allowing the water to exit through the hot drain valve into the bucket or to a drain.
- 15 Close the drain valve, disconnect the hose and replace the drain cap.
- 16 Open the hot system isolation valve.
- 17 Connect power to the water heater and return the appliance to service.

Protective gloves should be worn as prolonged skin contact could cause irritation
