The Powerful Watchdog Relay that Reboots

uSwitch

Control Anything Anywhere, Anytime Over the Web or Network

- Control anything from anywhere: Turn devices on and off, open/close doors and gates.
- Automatically or manually reboot network devices
- Log into uSwitch from any web enabled device including iPhone, Android, PC and Mac
- Secure and password protected
- Up to 110/220V 5 Amp relay contacts
- No programming required
- Small, compact and easy to install

What Will "U" Do with uSwitch?

uSwitchPro

All that uSwitch Does and More! User Customizable GPIO Inputs Control at the Push of Any Button

uSwitchPro offers the same functions as uSwitch but also includes GPIO inputs that can be used to trigger up to 16 other uSwitch relays locally or remotely across any network. uSwitch is a perfect solution to instantaneously trigger multiple relays in multiple locations remotely over a network from a contact. Application possibilities are endless!

What Will "U" Do with uSwitchPro?
Converts Relays to AC Power Outlets
The perfect accessory for uSwitch and uSwitchPro

- Supplies input power
- Snaps right on
- No need for wiring
- No need for splicing

uSwitch & uSwitchPro Product Specifications

Features
uSwitch family of products is controlled via any Web Browser and can also be controlled via CGI Commands

Specifications
Relays have Normally Open (NO) and Normally Closed (NC) Contacts each capable of switching max:
- 12VDC/10A
- 24VDC/10A
- 125VAC/5A
- 250VAC/3A

Auto Ping – Watch Dog
Unit can Ping 3 different IP Address/URL to confirm connectivity
Selectable auto reboot based on Ping Response

Supply
Requires external 12 volt DC / 500mA power supply
24v DC 500 MA version also available**Operation Range**
Industrial (-20°C to +80°C)

Standby current
(Relays OFF) - 58mA
One Relay on - 92mA
Both Relays on - 126mA

Dimensions
105 mm / 51 mm / 20 mm

Default
IP address: 192.168.1.199
Subnet Mask: 255.255.255.0
