Remington NOISELESS MODEL 7 Portable Typewriter

The World’s Finest Personal Typewriter
NOISELESS Model 7

8 BIG Features That Make This The FINEST PORTABLE That Money Can Buy!

- Silent Pressure Printing: The exclusive Noiseless action that silences the sound of the type against the platen and mutes the noise of the whole mechanism.
- Special Card Holder: Holds file cards so they can be typed to the very edge. Of special help to those collecting data for research or using regular card systems.
- Smooth Touch: A five-way regulator that adjusts to the touch of each operator, combined with pressure printing, makes the Noiseless Model 7 most responsive to your typing touch.
- Variable Line Spacer: Allows platen to be moved to any position. Lines up type accurately for fill-ins and corrections. Saves re-typing whole pages.
- Large-Sized Platen: Larger platen circumference for easy, correct feeding of standard size letterheads and envelopes of various widths.
- Sturdy Construction: Every part inside and out, has passed long, hard usage tests. Precision-engineered from the finest materials by skilled workmen. Lasts a lifetime!
- Single, Double, Triple Line Spacer: A great advantage in writing manuscripts in which wide spaces for corrections must be left between the lines.
- Speedy Tabulator Sets: A feature usually found only on big office machines. Tabulator key and full set of tabulator stops. Invaluable for statistical work and compiling of data.
