

**PRO-FORMANCE
HARD GEL
UV/LED**

Pro-Formance is the perfect choice for creating beautiful nail enhancements. Pro-Formance will maintain its durability regardless of your client's lifestyle.

PRO-FORMANCE APPLICATION

-  Start with clean, dry, sanitized hands and nails. Push back the cuticles and clean the surrounding nail plate. Shape the nail and gently buff all surface shine from the natural nail. Remove the dust and wipe the nail using a Gel Wipe moistened with Prep & Wipe.
-  Using an Akzentz Pro-Tab Nail Form, fit the nail form under the free edge of the natural nail (make sure the form fits the curvature of the natural nail). Using a gel brush, apply a very thin layer of Adhere Gel on the nail.
-  Cure for 30 seconds under a LED lamp or for 2 minutes under a UV lamp. Do not wipe off the dispersion film that is left on the nail after curing.
-  Starting at the free-edge, use Control Ultra, Control Natural, or Formation White to form a smile line and then extend the gel to the desired length and shape. Cure for 30 seconds under LED or 2 minutes under UV.
-  Apply Enhance, Balance or Structure onto the nail. Glide the gel over the stress area of the nail. Push the gel back towards the cuticle area and then lightly glide the gel over the extension pulling harder over the extension. Cure. Remove the nail forms. File and buff nails to shape.
-  Use Prep & Wipe to wipe off the dispersion film on the nail. File and buff nails to shape. Remove all dust from the nails.
-  Apply a medium/thin coat of Ultra Gloss to the entire nail (make sure to not pull the gel too hard). Cure for 30 seconds under a LED lamp or 2 minutes under a UV lamp.
-  Use Prep & Wipe to wipe off the dispersion film on the nail. Have the client wash their hands. Finish by applying Akzentz Nail & Cuticle Oil around the nail and massage in.

PRO-FORMANCE REMOVAL

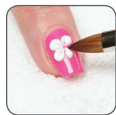

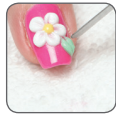

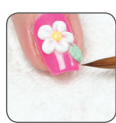

Pro-Formance is a professional UV/LED Hard Gel product and as such does not soak off. Removal methods vary according to individual preferences but we recommend that nail professionals follow industry standard hand filing and/or E-filing removal procedures.

**3D Gel Art
POWDER**

3D Gel Art Powder lets you get in touch with your artistic side. Mix with your choice of Options or Gel Play to create any 3D design you desire.

3D GEL ART POWDER APPLICATION

-  Using a spatula, thoroughly blend the Options or Gel Play Colour of your choice with the Gel Art Powder (1 part gel to 2 parts powder is recommended, may vary slightly depending on your preference).
-  Using the Akzentz 3D Brush 06, create a ball of the mixture and place it onto the nail.
-  Shape the mixture onto the nail into the desired design. The mixture will stay malleable for as long as you need it to. You can moisten the brush with Prep & Wipe, or create more texture by dabbing your brush in 3D Gel Art Powder.
-  Once you are satisfied with the design, freeze cure for 5 seconds in LED or 2 minutes in UV.
-  Continue to build your design piece by piece, freeze curing between each layer of the design.
-  You can also use tools such as a spatula to create small creases in your design (e.g. the stems within a leaf).
-  Once you are satisfied with your design and it has been fully cured, you can finish it with a gel top gloss such as Shine On or Luxio Gloss. If you would prefer, you may also leave it as is and wipe with a Gel Wipe moistened in Prep & Wipe to remove the residue.

NAILS PERFECTED – Only from Akzentz

**UV/LED GEL
APPLICATION INSTRUCTIONS**

Akzentz Professional Nail Products are manufactured by Haigh Industries Inc. Burnaby, BC Canada 604-278-5851 www.akzentz.com

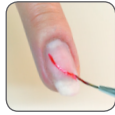

GEL PLAY SOAK OFF UV/LED

Akzentz line of UV/LED soak off gel that is specifically developed for nail art. Bring out your creative spirit with the unmatched potential of these highly pigmented paints and glitters.

GEL PLAY COLOUR APPLICATION

Gel Play can be used for fine lines and detailed art.

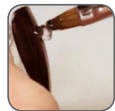

Gel Play can also be used for full coverage coats. For best results, keep layers thin.

BLING ON

Bling On is a thick consistency gel that stays put and is extra strong to keep gems, stones and embellishments on.

Etch the area of the nail to prep.

Apply Bling On to the desired area.

Apply your crystals or charms over top and press into the gel.

Cure the nail and rotate from side to side, to cure the Bling On from all angles.

Apply Shine On or Luxio Gloss around the edges with a liner brush to secure in place. Cure.

GLITTER ME

Clear gel base with just the right consistency for adding glitters already owned to create personal glitter gels.

You can use your personal glitter powders and mix them with our Glitter Me to make beautiful, pigmented, and consistent custom gels.

LUXIO SOAK OFF UV/LED

Luxio is 100% pure gel that is odourless and solvent free. Formulated to coat and protect the natural nail. Luxio delivers ease of application along with maximum control making it the perfect choice for a long lasting gel manicure or pedicure.

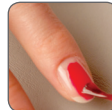

LUXIO APPLICATION

Start with clean, dry, sanitized hands and nails. Push back the cuticles and clean the surrounding nail plate. Shape the nail and gently buff all surface shine from the natural nail. Remove the dust and wipe the nail using a Gel Wipe moistened with Prep & Wipe.

Apply a thin layer of LUXIO Base Gel to the entire nail surface (seal in the free edge). Place under the UV Lamp for 2 minutes (LED 30 seconds).

Apply LUXIO Colour by brushing on a thin coat of colour to the entire nail surface (seal in the free edge). Place under the UV Lamp for 2 minutes (LED 30 seconds). For more coverage, apply a second layer of LUXIO Colour and place under the UV Lamp for 2 minutes (LED 30 seconds).

Apply a coat of LUXIO Gloss to the entire nail (seal in the free edge) for a high shine finish. Place under UV for 2 minutes (LED 30 seconds).

Wipe off dispersion film using a Gel Wipe moistened with Prep & Wipe. Apply Nail and Cuticle Oil to finish.

OPTIONS & LUXIO SOAK OFF GEL REMOVAL

Lightly file the surface shine from the nail to break the seal with a medium grit file.

Saturate an Akzentz Foil Wrap with Soak Off or Enviro Soak Solution. Let it soak for 10 minutes.

After the Foil Wrap is removed, we recommend gently removing the softened gel with the Akzentz Metal Cuticle Pusher.

You are now ready for your next Akzentz UV/LED gel application. If you are not re-applying you may apply Nail & Cuticle Oil and massage it in.

OPTIONS SOAK OFF UV/LED

From gel nail enhancement to the ultimate manicure or pedicure, Options delivers strength, flawless results and long lasting wear. Professionally applied by using a gel brush for the precision and control you desire.

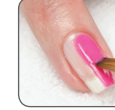

OPTIONS COLOUR APPLICATION

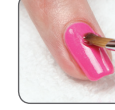

Start with clean, dry, sanitized hands and nails. Push back the cuticles and clean the surrounding nail plate. Shape the nail and gently buff all surface shine from the natural nail. Remove the dust and wipe the nail using a Gel Wipe moistened with Prep & Wipe.

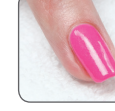

Apply a thin layer of Options Base or Options Opti-Bond to the entire nail surface, encasing the free edge. Cure under LED for 30 seconds or UV for 2 minutes.

Apply a thin layer of colour with a gel brush and cure under LED for 30 seconds or UV for 2 minutes. For more coverage, apply a second thin coat and cure once more.

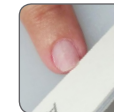

Apply a thin coat of Options UV/LED Clear or Crystal Clear for a high gloss shine. Cure under LED for 30 seconds or UV for 2 minutes.

Wipe off dispersion film using a Gel Wipe moistened with Prep & Wipe. Apply Nail and Cuticle Oil to finish.

OPTIONS SCULPTURED APPLICATION

Start with clean, dry, sanitized hands and nails. Gently shape and buff the surface shine of the natural nail with a light grit buffer. Wipe the nail with Akzentz Prep & Wipe on an Akzentz Gel Wipe and let dry.

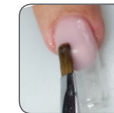

Apply your Akzentz Pro-Tab form snugly to the nail. Apply a very thin layer of Akzentz Options Opti-Bond using a Akzentz Oval Gel Brush and cure (30 seconds in LED, 2 minutes in UV).

Apply Akzentz Options Clear, Crystal Clear, or Pink to the nail and form to sculpt the nail extension. Cure. (30 seconds in LED or 2 minutes in UV).

Remove the form, wipe the residue with a Gel Wipe moistened in Prep & Wipe. If needed, shape the extension with a medium grit file and when complete, wipe the nail again with a Gel Wipe moistened in Prep & Wipe.

You can either complete your nail with another layer of Options Clear or Crystal Clear as your high gloss finish, or you can apply an Akzentz colour to the nail, cure as required, and then apply Options Clear or Crystal Clear to finish.
