

SPA BEAUTY WELLNESS Laundry Operation Chart

NOTE: FOR BOTH TOP LOADER AND FRONT LOADER MACHINES.

Sort and separate light soiled items from heavily soiled.

Prewash in cold water.

For **heavily soiled** items, run a cold Rinse & Spin Cycle or Quick Cold Wash first to help break up the soils. Add 3g per KG of TITAN Laundry Powder and 2ml per KG of HY.WASH Laundry Degreaser.

Cycles are approximately 17 mins.

Choose water temperature and main wash cycle.

- Add 10g per KG of TITAN Laundry Powder
- 4ml per KG of HY.WASH Laundry Degreaser
- Add 2g per KG of Laundry Soaker.

Move items to dryer and set to normal.

NOTE: HY.WASH Laundry Degreaser kills 99.99% of germs and removes oil retention.

TIPS

- Don't overfill the washing machine. 3/4 full is recommended.
- Rinse & Spin in cold water before the main wash.
- Add powders and liquids to correct chemical trays.
- Rinse & Spin/quick cold wash is not the preferred main wash cycle.

PRODUCT

“We have had zero retention of massage oils, spray tanning liquid, tint or facial products in our towels and sheets since we started using the HY.WASH products at the start of September 2019”
- SPA MANAGER VICTORIA 2020 -

“I have tried numerous products on the market to wash the towels and sarongs for my massage clinic over the years, but was never fully satisfied with any of them. HY.GIENE laundry range is fantastic for getting rid of rancid oil smells, and now the towels and sarongs always come out of the wash so clean and fresh!”
- MASSAGE THERAPIST VICTORIA 2021-

HY.GIENE AUSTRALIA Pty Ltd
