

BRONSUN DYE COLORISTICS

GEL DYE BRONSUN

COLORISTICS BASICS

#1 BLACK

A classic color for eyelash tinting. Being mixed with other colors from the palette, darkens them or helps to create colder shades during eyebrow tinting. Has a cold base.

#2 GRAPHITE

A shade of medium intensity for tinting the eyebrows of raven-haired clients or those having cold blond hair (ash or pearl blond). Has a blue-green core and cold base.

#3 BLUE BLACK

A deep and intense shade for eyelash tinting. Perfect for those who want more than regular black. It can also be used to neutralize yellowness. Has a **cold base** and blue core.

#4 CHESTNUT

A non-intense shade that is perfect for tinting the eyebrows of medium blond types. Has a yellow-green core and **neutral base**.

#4.1 RED CHESTNUT

An intense red shade for ginger, red and mahogany hair color. Used for creating new colors and correction of unwanted shades. Has a **warm base** and red-orange core.

#5 LIGHT BROWN

A shade of medium intensity, perfect for clients with red, medium-blond and fair hair with straw, golden or ash tone. Has a yellow core and warm base.

#6 BROWN

An intense shade for clients with dark-blond hair. Has a blue-green core and neutral base.

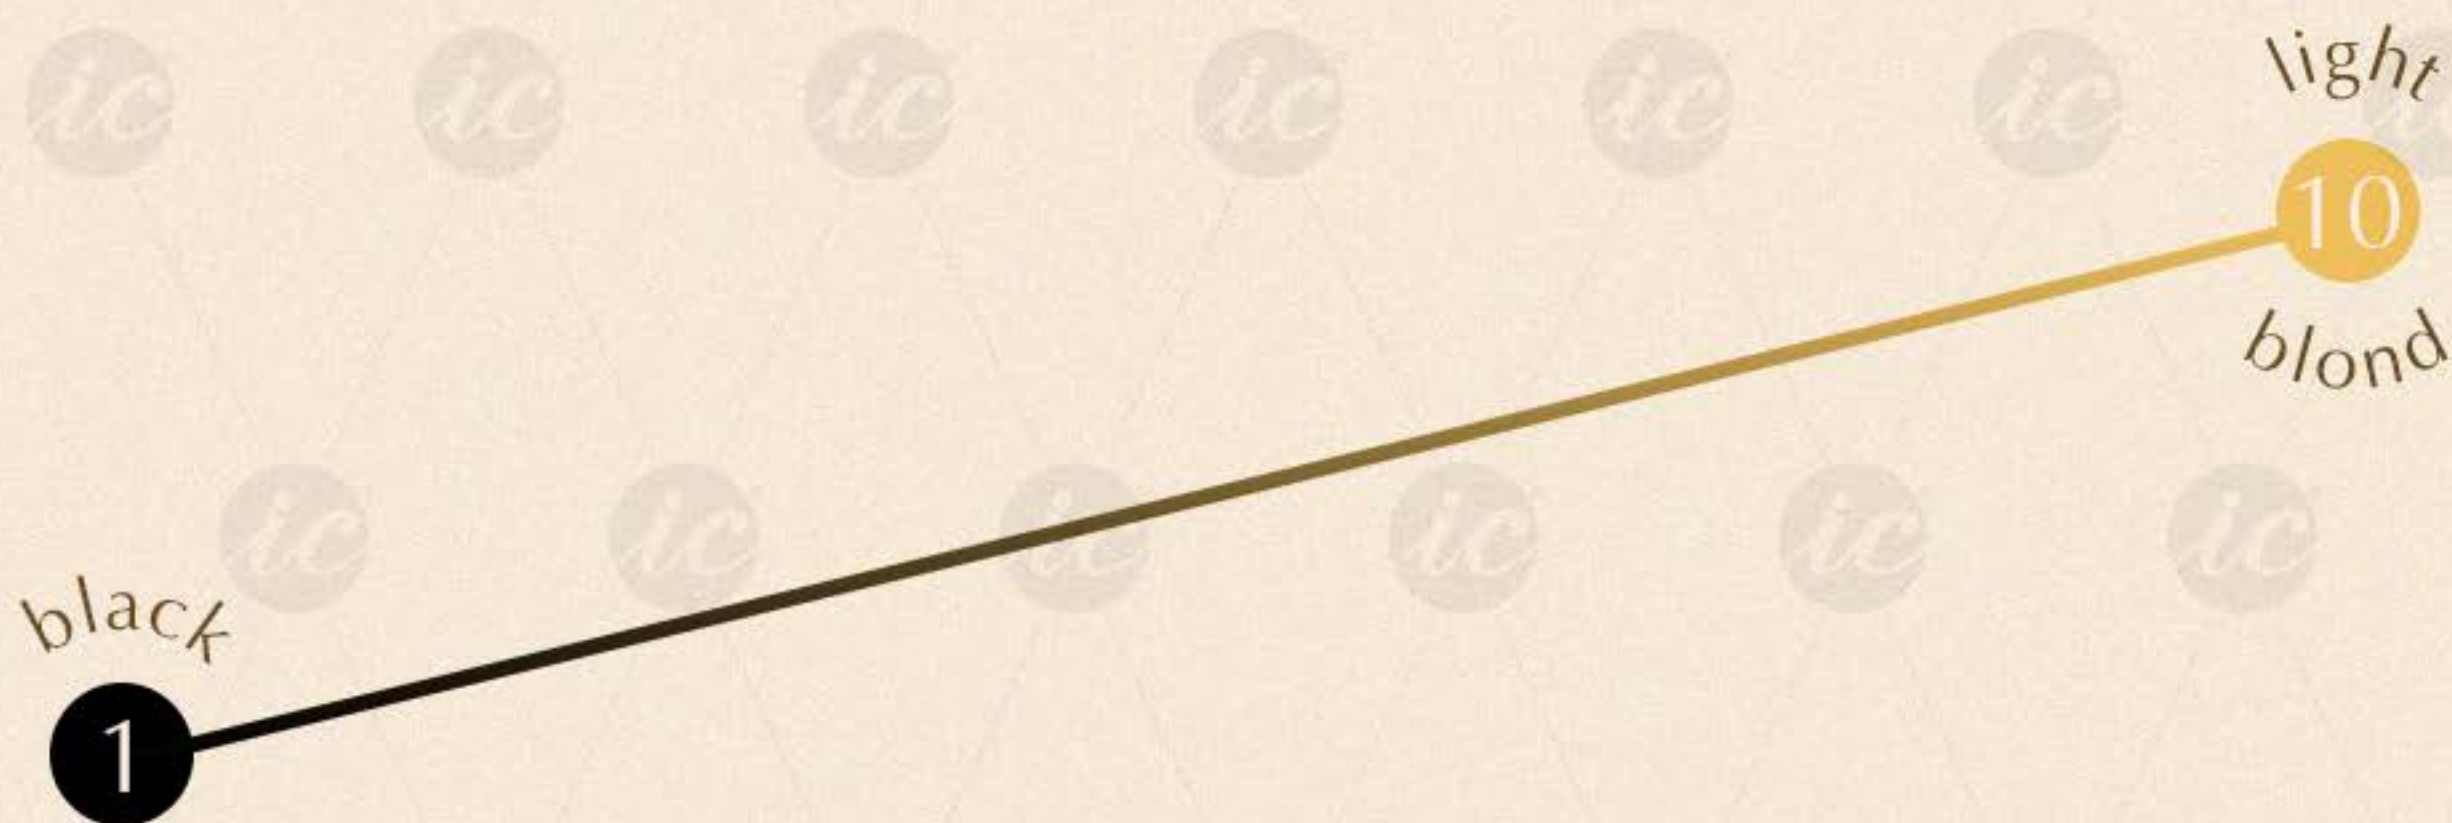

#7 DARK BROWN

An intense shade for clients with tanned skin and dark hair. Has a blue-green & dark green core and cold base.

TO CHOOSE THE RIGHT SHADE OF THE DYE,

one should define the original color of eyebrow hairs or shade depth level.

The scale of basic natural shades goes from 1 to 10, where 1 is for black and 10 is for light blond.
