

BRONSUN DYE COLORISTICS

TOP MIXES

DYE COLORS OVERVIEW

#1 Black

a **classic color for eyelash tinting**. Being mixed with other colors from the palette, darkens them or helps to create **colder shades** during eyebrow tinting. Has a **cold base** and purple core.

#2 Graphite

a shade of medium intensity for tinting the eyebrows of **raven-haired** clients or those having **cold blond** hair (ash or pearl blond). Has a blue-green core and **cold base**.

#3 Blue Black

a deep and intense shade for eyelash tinting. Perfect for those who want more than regular black. It can also be used to **neutralize yellowness**. Has a **cold base** and blue core.

#4 Chestnut

a non-intense shade that is perfect for tinting the eyebrows of **medium blond types**. Has a yellow-green core and **neutral base**.

#4.1 Red Chestnut

an intense **red shade** for **ginger, red and mahogany hair color**. Used for creating new colors and correction of unwanted shades. Has a **warm base** and red-orange core.

#5 Light Brown

a shade of medium intensity, perfect for clients with red, medium-blond and fair hair with **straw, golden or ash tone**. Has a yellow core and **warm base**.

#6 Brown

an intense shade for clients with **dark-blond hair**. Has a blue-green core and **neutral base**.

#7 Dark Brown

an intense shade for clients with **tanned skin and dark hair**. Has a blue-green & dark green core and **cold base**.

BLOND

WHAT **BRONSUN** DYES SHOULD A BEGINNER CHOOSE?

If you are **a practicing brow master**, we recommend you purchase **the whole BRONSUN dye palette** to be able to **satisfy all your clients' demands**.

But if you are **a beginner** and only start your work, you can just get the most **popular and general shades for creating mixes**.

BRONSUN DYES FOR BEGINNERS

#2

GRAPHITE

blue-green core, cold base

#4

CHESTNUT

yellow-green core, neutral base

#5

LIGHT BROWN

yellow core, warm base

#6

BROWN

blue-green core, neutral base

Mixing these shades, one can create mixes practically for any client.

FACTORS THAT AFFECT THE TINTING RESULT OF A MIX

- **SKIN TYPE** (dry, normal, oily)
- **HAIR TYPE** (thin, normal, thick)
- **CONDITION OF HAIR CUTICLE** (porosity)
- **INDIVIDUAL PECULIARITIES** (hormonal changes, medication intake)
- **OBSERVANCE OF SAFETY RULES WHEN WORKING WITH AN OXIDIZER** (using Milk-cream Developer BRONSUN in correct proportions)
- **TECHNIQUE OF APPLYING A DYE** (application in a thin layer)
- **EXPOSURE TIME OF A DYE** (7-20 minutes on eyebrows)
- **CORRECT PREPARATION OF THE EYEBROW AREA** for tinting

TO PREPARE THE EYEBROW AREA FOR
TINTING IN A BETTER WAY, WE
RECOMMEND USING

BRONSUN EYEBROW CARE LINE PRODUCTS

EYEBROW PRIMER

removes makeup residues, cleanses and degreases the skin and hairs without drying them out.

EYELASH & EYEBROW SALINE SOLUTION

cleanses and degreases the eyebrows and eyelashes.

EYEBROW SHAMPOO

cleanses and degreases the eyebrows and skin under but also provides required care.

EYEBROW CONDITIONER

cleanses the eyebrows from dye residues and helps to protect tinted hairs, keeping the color rich and intense.

EYEBROW COLOR FIXING LOTION

promotes color fixation after the tinting procedure and provides a long-lasting effect.
