4. Choose the silicone pads of the right size. By using FIXING GLUE IC FACTORY or WAX GLUE BALM IC FACTORY, fix the upper eyelashes on the pads, following the distribution rules: distribute the eyelashes parallel to each other, without intersection. For easy distribution, use an applicator or eyelash extension tweezers.

The recommended exposure time for the composition is 5-12 minutes (depending on the eyelash density and thickness). In case of having too coarse, thick eyelashes, the exposure time can be increased up to 15 minutes.
 - 5-7 minutes for thin, porous eyelashes;

6. As the exposure time is over, carefully remove the composition with a dry cotton swab, moving from the roots to tips of the eyelashes.
7. Carry out the eyelash tinting procedure. In a non-metallic tare, thoroughly mix milk-cream developer BRONSUN and gel dye BRONSUN in a ratio of 1:1. Carefully apply the mixture to the entire eyelash length, avoiding contact with eyes. For details, see the instructions on using the dye and developer. The recommended exposure time for dye on the eyelashes is 3-8 minutes.

9. Use the cleanser to take off the silicone pads from the eyelids. With a cotton swab, soaked with the composition, wipe the eyelid skin under the pad to smoothly remove it. Thoroughly cleanse the interlash space from glue and dye residue, comb the eyelashes.
10. At the end of the procedure, apply a small amount of Composition ONE STEP VOLUME FILLER IC FACTORY in a curling motion to the entire eyelash length. Let it soak for a couple of minutes. Then, gently comb the eyelashes. Blot the excess composition with a cotton swab if needed.
