

How To Use And Apply The Mask?

1

Prepare Your Skin & Mask

Begin by cleansing your face. In a bowl, mix 30-50g of the mask powder.

2

Create the Paste

Gradually add water to the powder until you achieve a dense paste consistency. Be cautious not to use too much water, as this could make the mask difficult to remove in one piece.

3

Apply the Mask

Spread a generous layer of the paste over your face and neck. Allow it to dry for 10-15 minutes, or until it's completely solidified.

4

Remove the Mask

Gently peel the mask off, starting from either the forehead or the bottom of the neck. Use a moist towel to remove any remaining bits of the mask.

5

Post-Mask Care

After removing the mask, enhance your skincare routine by applying your preferred serum. Dispose of the used mask in the trash.

Frequently Asked Questions

A close-up, profile view of a woman with dark hair, smiling as she applies a white cream to her cheek with her fingers. The background is a soft, out-of-focus light color.

Is it Safe to Use Panemorfi Jelly Masks Following Chemical Peels or Similar Treatments?

Indeed, several Panemorfi Jelly Masks are designed specifically to provide relief after chemical treatments. However, it's important to check for any potential conflicts with ingredients.

Can I Apply Panemorfi Jelly Masks on Areas with Eyes or Facial Hair?

Yes, you can apply the masks over closed eyes, ensuring to avoid any direct contact with the eyes themselves to prevent irritation. Additionally, these masks are safe to use over facial hair and are effective in soothing the skin post-brow shaping or facial waxing, as they do not interfere with hair.
