

SAFETY DATA SHEET

1. IDENTIFICATION OF THE MATERIAL AND SUPPLIER				
1.1. Product (material) name:		Peach Paraffin Wax		
1.2. Other names:		Paraffin Based Moisturising Treatment Wax		
1.3. Recommended use:		Moisturising Treatment		
1.4. Supplier:		Caronlab Australia Pty Ltd		
1.5. Address:		148-150 Victoria St, North Geelong, Victoria, 3215, Australia		
1.6. Phone:		(03) 5227 4999		
1.7. Fax:		(03) 5227 4950		
1.8. Email:		info@caronlab.com.au		
1.9. Emergency Contacts:		Pois ons Information Centre (Australia) 13 11 26		
	2. HAZARD	S IDENTIFICATION		
2.1. Hazard classification:		Non-hazardous according to NOHSC criteria.		
2.2. Riskphrase(s):		Not a pplicable		
2.3. Safety phrase(s)		Notapplicable		
	3. IN	IGREDIENTS		
Ingredients:	CAS number:	Concentration:		
Paraffin	8002-74-2	>60%		
Pa ra ffinum Li guidum	8012-95-1 / 804	12-47-5 <10%		
Olea Europaea Oil	8001-25-0 / 156			
Tri ti cum Vulgare Germ Oil	84012-44-2	<10%		
Parfum	N/A	<10%		
CI 60505	82-38-2	<10%		
	4. FIRST	AID MEASURES		
4.1. Description of necessary first aid me				
Ingestion:		Rinse mouth out with water. If swallowed, give a glass of water		
		to drink. If vomiting occurs give further water. Seek medical		
		advice.		
Eye:				
Skin:		Intended for use on skin. No reaction anticipated. If irritation		
		occurs seek medical advice. For skin burns, immediately flood		
		burnt area with plenty of water, cover with a clean dry dressing		
		and seek medical help.		
Inhalation:		Remove person from area of exposure. Seek medical a dvice if		
		effects persist. For fumes from molten material: remove person		
		from exposure. Remove contaminated clothing and loosen		
		remaining clothing. Allow patient to assume most comfortable		
		position and keep warm. Keep at rest until fully recovered.		
4.2. Medical Attention And Special Treat	ment	,		
First Aid Facilities:		A source of clean water should be a vailable in the work area for		
		flushing eyes and skin.		
Notes to physician		Treatsymptomatically		
The same of projections	5. FIRE FIG	HTING MEASURES		
5.1. Flammable properties				
5.2. Suitable extinguishing media:		Dry che mical, carbon dioxide, foam or water may be used. Do		
The same and the s		not use straight streams of water on burning material as it may		
		cause spattering and spread the fire. Sand / earth can be used		
		on small fires.		
5.3. Hazards from combustion products:		During a fire irritating and toxic gases maybe produced by		
2.2. Traza ras from compastion products.		combustion or thermal decomposition. Wear a breathing		
		apparatus		
5.4. Protective equipment for firefighter	rs:	Move exposed containers from fire a reas if possible. Firefighters		
		should wear full protective clothing including self contained		
		breathing a pparatus.		
	6. ACCIDENTAL	L RELEASE MEASURES		
6.1. Personal precautions	J. J. JOSID EIGIA	None known		
		Do not discharge into lakes, streams, ponds or public waters.		
6.2. Environmental precautions		Advise a uthorities if the product has penetrated drains, sewers		
		and water pipes.		
6.3. Methods for containment		Not applicable		
6.4. Methods for cleaning		Remains in solid form under normal conditions, pick up or sweep		
	7 11445	s pilled product. If molten, allow to cool and s crape up.		
	/. HANDLII	NG AND STORAGE		

SAFETY DATA SHEET

7.1. Handling	Avoid contact with eyes. Avoid breathing in vapour.	
	Observe precautions found on label. Wash face and hands	
	thoroughly with soap and water after use and before eating.	
7.2. Storage	Store containers upright and closed.	
	Keep out of reach of children.	
	Store in a cool, dry preferably below 30°C and a way from direct	
	sunlight.	
8 EXPOSIBE CONT	FROLS/PERSONAL PROTECTION	
8.1. National exposure standards None allocated		
8.2. Biological limit values	None allocated	
8.3. Engineering controls	General ventilation normally a dequate	
8.4. Personal protective equipment	Gloves may be used to minimise contact.	
	ND CHEMICAL PROPERTIES	
9.1. Appearance:	Opaque peach solid paraffin	
9.2. Odour:	Synthetic fra grance resembling peach	
9.3. Vapour Pressure:	Not a va ilable	
9.4. Va pour density:	Not a vailable	
9.5. Softening point:	40 +/- 5°C	
9.6. Melting point:	40 +/- 5 °C	
9.7. Solubility in water:	Insoluble	
9.8. Specific gravity:	0.76 – 0.82 g/mL	
9.9. Flammable materials information:	on o diez grinz	
flash point and method of detecting flash point;	Not applicable	
upper and lower flammable (explosive) limits in air;	Not determined	
and	Not determined	
	Not determined	
ignition temperature.	Not determined	
9.10. Viscosity at room temperature:	Solid	
9.11. Percent volatile:	Not a vailable	
11.1	LITY AND REACTIVITY	
10.1. Chemical Stability:	Stable under normal condition.	
10.2. Conditions to a void:	Do not mix with other chemicals.	
	Avoid exposure to excessive heat, sources of ignition and open	
	flames	
10.3. Incompatible materials:	oxidisers	
10.4. Hazardous decomposition products:	Combustion may yield large amounts of oxides of carbon,	
	s moke, incomplete combustion products, flammable	
	hydrocarbons.	
10.5. Hazardous reactions:	None known	
	I Notice known	
11. TOXICOI	LOGICAL INFORMATION	
	LOGICAL INFORMATION	
11.1. Likely routes of exposure:		
11.1. Likely routes of exposure: 11.2. He alth effects from the likely routes of exposure:	Skin, e yes, inhaled.	
11.1. Likely routes of exposure: 11.2. He alth effects from the likely routes of exposure: 11.2.1. Acute	Skin, eyes, inhaled. No specific toxicological data is a vailable.	
11.1. Likely routes of exposure: 11.2. He alth effects from the likely routes of exposure:	Skin, eyes, inhaled. No specific toxicological data is a vailable. No a dverse effects expected. However, large a mounts may	
11.1. Likely routes of exposure: 11.2. Health effects from the likely routes of exposure: 11.2.1. Acute Ingestion:	No specific toxicological data is a vailable. No a dverse effects expected. However, large a mounts may cause nausea and vomiting.	
11.1. Likely routes of exposure: 11.2. He alth effects from the likely routes of exposure: 11.2.1. Acute	No specific toxicological data is a vailable. No adverse effects expected. However, large a mounts may cause nausea and vomiting. May be an eye irritant. Exposure to the dust may cause	
11.1. Likely routes of exposure: 11.2. Health effects from the likely routes of exposure: 11.2.1. Acute Ingestion:	No specific toxicological data is a vailable. No adverse effects expected. However, large a mounts may cause nausea and vomiting. May be an eye irritant. Exposure to the dust may cause discomfort due to particulate nature. May cause physical	
11.1. Likely routes of exposure: 11.2. Health effects from the likely routes of exposure: 11.2.1. Acute Ingestion:	Skin, eyes, inhaled. No specific toxicological data is a vailable. No adverse effects expected. However, large a mounts may cause nausea and vomiting. May be an eye irritant. Exposure to the dust may cause discomfort due to particulate nature. May cause physical irritation to the eyes. Fumes from molten material may be mildly	
11.1. Likely routes of exposure: 11.2. He alth effects from the likely routes of exposure: 11.2.1. Acute Ingestion: Eye:	Skin, eyes, inhaled. No specific toxicological data is a vailable. No adverse effects expected. However, large a mounts may cause nausea and vomiting. May be an eye irritant. Exposure to the dust may cause discomfort due to particulate nature. May cause physical irritation to the eyes. Fumes from molten material may be mildly irritating.	
11.1. Likely routes of exposure: 11.2. Health effects from the likely routes of exposure: 11.2.1. Acute Ingestion:	Skin, eyes, inhaled. No specific toxicological data is a vailable. No a dverse effects expected. However, large a mounts may cause nausea and vomiting. May be an eye irritant. Exposure to the dust may cause discomfort due to particulate nature. May cause physical irritation to the eyes. Fumes from molten material may be mildly irritating. Not expected to be an irritant. Molten material may cause skin	
11.1. Likely routes of exposure: 11.2. Health effects from the likely routes of exposure: 11.2.1. Acute Ingestion: Eye: Skin:	Skin, eyes, inhaled. No specific toxicological data is a vailable. No a dverse effects expected. However, large a mounts may cause nausea and vomiting. May be an eye irritant. Exposure to the dust may cause discomfort due to particulate nature. May cause physical irritation to the eyes. Fumes from molten material may be mildly irritating. Not expected to be an irritant. Molten material may cause skin burns.	
11.1. Likely routes of exposure: 11.2. He alth effects from the likely routes of exposure: 11.2.1. Acute Ingestion: Eye:	No specific toxicological data is a vailable. No a dverse effects expected. However, large a mounts may cause nausea and vomiting. May be an eye irritant. Exposure to the dust may cause discomfort due to particulate nature. May cause physical irritation to the eyes. Fumes from molten material may be mildly irritating. Not expected to be an irritant. Molten material may cause skin burns. When heated, the vapour/fumes given off may cause respiratory	
11.1. Likely routes of exposure: 11.2. Health effects from the likely routes of exposure: 11.2.1. Acute Ingestion: Eye: Skin: Inhalation:	Skin, eyes, inhaled. No specific toxicological data is a vailable. No a dverse effects expected. However, large a mounts may cause nausea and vomiting. May be an eye irritant. Exposure to the dust may cause discomfort due to particulate nature. May cause physical irritation to the eyes. Fumes from molten material may be mildly irritating. Not expected to be an irritant. Molten material may cause skin burns. When heated, the vapour/fumes given off may cause respiratory tractirritation.	
11.1. Likely routes of exposure: 11.2. Health effects from the likely routes of exposure: 11.2.1. Acute Ingestion: Eye: Skin:	No specific toxicological data is a vailable. No a dverse effects expected. However, large a mounts may cause nausea and vomiting. May be an eye irritant. Exposure to the dust may cause discomfort due to particulate nature. May cause physical irritation to the eyes. Fumes from molten material may be mildly irritating. Not expected to be an irritant. Molten material may cause skin burns. When heated, the vapour/fumes given off may cause respiratory	
11.1. Likely routes of exposure: 11.2. Health effects from the likely routes of exposure: 11.2.1. Acute Ingestion: Eye: Skin: Inhalation:	Skin, eyes, inhaled. No specific toxicological data is a vailable. No a dverse effects expected. However, large a mounts may cause nausea and vomiting. May be an eye irritant. Exposure to the dust may cause discomfort due to particulate nature. May cause physical irritation to the eyes. Fumes from molten material may be mildly irritating. Not expected to be an irritant. Molten material may cause skin burns. When heated, the vapour/fumes given off may cause respiratory tractirritation.	
11.1. Likely routes of exposure: 11.2. Health effects from the likely routes of exposure: 11.2.1. Acute Ingestion: Eye: Skin: Inhalation: 11.2.2. Chronic 11.3. Other Information:	Skin, eyes, inhaled. No specific toxicological data is a vailable. No adverse effects expected. However, large a mounts may cause nausea and vomiting. May be an eye irritant. Exposure to the dust may cause discomfort due to particulate nature. May cause physical irritation to the eyes. Fumes from molten material may be mildly irritating. Not expected to be an irritant. Molten material may cause skin burns. When heated, the vapour/fumes given off may cause respiratory tract irritation. No long term effects are known.	
11.1. Likely routes of exposure: 11.2. Health effects from the likely routes of exposure: 11.2.1. Acute Ingestion: Eye: Skin: Inhalation: 11.2.2. Chronic 11.3. Other Information:	Skin, eyes, inhaled. No specific toxicological data is a vailable. No adverse effects expected. However, large a mounts may cause nausea and vomiting. May be an eye irritant. Exposure to the dust may cause discomfort due to particulate nature. May cause physical irritation to the eyes. Fumes from molten material may be mildly irritating. Not expected to be an irritant. Molten material may cause skin burns. When heated, the vapour/fumes given off may cause respiratory tract irritation. No long term effects are known. None OGICAL INFORMATION	
11.1. Likely routes of exposure: 11.2. Health effects from the likely routes of exposure: 11.2.1. Acute Ingestion: Eye: Skin: Inhalation: 11.2.2. Chronic 11.3. Other Information: 12. ECOLO 12.1. Ecotoxicity:	Skin, eyes, inhaled. No specific toxicological data is a vailable. No adverse effects expected. However, large a mounts may cause nausea and vomiting. May be an eye irritant. Exposure to the dust may cause discomfort due to particulate nature. May cause physical irritation to the eyes. Fumes from molten material may be mildly irritating. Not expected to be an irritant. Molten material may cause skin burns. When heated, the vapour/fumes given off may cause respiratory tract irritation. No long term effects are known. None OGICAL INFORMATION Avoid contaminating waterways	
11.1. Likely routes of exposure: 11.2. Health effects from the likely routes of exposure: 11.2.1. Acute Ingestion: Eye: Skin: Inhalation: 11.2.2. Chronic 11.3. Other Information: 12. ECOLO 12.1. Ecotoxicity: 12.2. Persistence and degradability:	Skin, eyes, inhaled. No specific toxicological data is a vailable. No adverse effects expected. However, large a mounts may cause nausea and vomiting. May be an eye irritant. Exposure to the dust may cause discomfort due to particulate nature. May cause physical irritation to the eyes. Fumes from molten material may be mildly irritating. Not expected to be an irritant. Molten material may cause skin burns. When heated, the vapour/fumes given off may cause respiratory tract irritation. No long term effects are known. None OGICAL INFORMATION Avoid contaminating waterways Expected to be persistent.	
11.1. Likely routes of exposure: 11.2. Health effects from the likely routes of exposure: 11.2.1. Acute Ingestion: Eye: Skin: Inhalation: 11.2.2. Chronic 11.3. Other Information: 12. ECOLO 12.1. Ecotoxicity:	Skin, eyes, inhaled. No specific toxicological data is a vailable. No adverse effects expected. However, large a mounts may cause nausea and vomiting. May be an eye irritant. Exposure to the dust may cause discomfort due to particulate nature. May cause physical irritation to the eyes. Fumes from molten material may be mildly irritating. Not expected to be an irritant. Molten material may cause skin burns. When heated, the vapour/fumes given off may cause respiratory tract irritation. No long term effects are known. None OGICAL INFORMATION Avoid contaminating waterways

13. DI	SPOSAL CONSIDERATIONS		
13.1. Dis posal methods and containers:	Dispose the waste as a non-hazardous organic solid according to		
	local and state regulations.		
	Contact relevant authority for details. No special considerations		
	for containers.		
14. TRANSPORT INFORMATION			
14.1. UN Number:	Not a pplicable		
14.2. UN Proper Shipping Name:	Not a pplicable		
14.3. Class and subsidiary risk:	Not a pplicable		
14.4. Packing Group:	Not a pplicable		
14.5. Special precautions for user:	Not a pplicable		
14.6. Hazchem Code:	Not a pplicable		
15. REGULATORY INFORMATION			
15.1. Regulatory Status:	Not a pplicable		
16. OTHER INFORMATION			
16.1. Document Information:	Document Issued 22/11/17		
	Replaces 06/09/2012		
16.2. Additional Information:	The information contained in this MSDS is, to the best of Caron		
	La boratories' knowledge and belief, accurate and reliable as of		
	the date issued. The information is provided without any		
	warranty, expressed or implied regarding its correctness or		
	a ccura cy. Si milarly, no warranty expressed or implied shall be		
	created or inferred regarding the product described in this MSDS		
	and Caron Laboratories Pty Ltd will not assume liability for any		
	loss or damage a rising out of the use of this information. It is the		
	user's responsibility to satisfy it self that the product is suitable		
	for its intended use
