

## RECLINING PILLOW LOUNGER INSTRUCTIONS

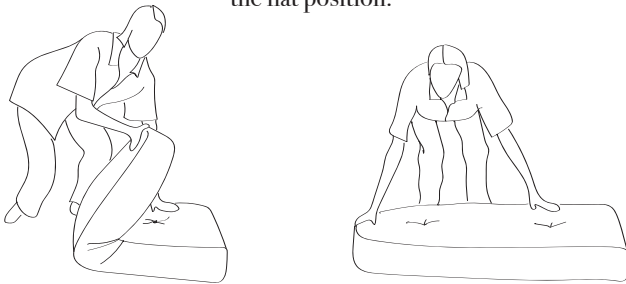

### Adjusting Backrest

Place one hand behind the backrest and one hand on the seat and push backrest up. You will feel the lounger click into place. Continue this for the 7 recline positions.

### Resetting

Push the backrest all the way forward until the clicking stops and allow lounger to fall back to the flat position.

### Don't do this!

Do not push the backrest back with force or rock backwards. This could damage the mechanism.
