

Instruction Manual for Phone Mount for Bicycles

Read through this entire instruction manual BEFORE using the **Phone Mount for Bicycles**

LIMITED PRODUCT WARRANTY INFORMATION: This Product comes with a 30 DAY Limited Warranty from the date of the retail purchase by the original end-user. If a material or workmanship defect arises and a valid claim is received within the Warranty Period, the Product will be repaired or replaced. Protocol™ cannot be held liable for damages to personal property. This Product Warranty does not, under any circumstance, cover the replacement or cost of any electronic or personal property used with the Product.

For service claims or questions please consult our website ProtocolNY.com.

- A. Main holder
- B. Mounting plate
- C. Pins
- D. Foot rest
- E. Bracket
- F. Bracket screw
- G. Mounting screw
- H. Side arm button
- I. Side arm

1. Attach the main holder to the mounting plate making sure the four pins on the mounting plate slide into the tracks on the main holder. Make sure the pins slide from the wider portion of the tracks to the smaller portion to lock into place.
2. Making sure that the foot rest on the main holder is at the bottom, loosen the bracket screw until the bracket is wide enough to slip over the handlebar. Included inside the bracket are two loose pieces of rubber to help create a snug fit if needed.
3. Tighten the screw back up once the bracket is in the desired position.
4. Loosen the mounting screw and adjust the mounting plate to a desired angle. Tighten the mounting screw once this is done.
5. Press the small button on the side of the main holder. This will automatically open the side arms. Place the phone inside the main holder and press the small button again while pushing in the side arms until you reach a snug fit.
