

Instruction Manual for Poker Chip Dispenser

Thank you for purchasing this Poker Chip Dispenser from Protocol. It has been designed to provide you with years of enjoyment if used properly.

There are two ways to load the poker chips included with the dispenser.

I. LOAD FROM FRONT

1) When empty or nearly empty, we recommend using the latched door. Push the latch upwards to unlock the door, then swing open the door and load chips from the front. Before closing the door, check to see that the column of chips is nicely aligned inside the column. This will facilitate smooth dispensing of the chips.

OR

II. LOAD FROM TOP

2) To load just a few chips at a time to the dispenser you can simply drop them in through the openings located at the top of each column.

To dispense the chips, pull out one of the pull tabs located at the bottom of column of chips. Chips are dispensed 5 at a time.

TROUBLESHOOTING

The chips didn't stack flat when dropped in from the top and some chips are sitting on edge inside the column:

- 1) To get the chips to lay flat when some are on edge, push up on the column from the bottom using one or two fingers through the dispensing hole at the bottom. Jiggling the chips a few times usually gets them to fall flat in the column.
- 2) If that fails, give the unit a bit of a shake to get the chips to re-settle properly, or
- 3) Open the door from in the front and manually reposition the chips to the proper orientation.

The pull tabs are stuck:

- 1) Do not force the pull tab to come out. If stuck, gently jiggle the pull tab and try again.

DO NOT MOVE THE CHIP DISPENSER WHILE THE DOOR IS NOT LATCHED AS DOOR MAY SWING OPEN AND THE CHIPS CAN FALL OUT

THIS UNIT IS DESIGNED TO OPERATE SPECIFICALLY WITH THE POKER CHIP SET INCLUDED. OTHER POKER CHIPS VARY IN SIZE AND MAY NOT WORK RELIABLY.

We're dedicated to bringing you well-designed products that make living fun and easy.
