

Item Number	6442-3CD
Product Name	Survival Kit Directions
Type of Packaging	1 color manual
Size	
Note	

**HOW TO USE THE
WATER COMPASS**

- ① Place the compass on a flat, non-porous surface such as a table or a piece of plastic.
- ② Pour a few drops of water inside the compass.
- ③ Magnetize a piece of metal such as a pin or paper clip by rubbing it against a magnet or even through your hair!
- ④ Take the metal and place it on the water. If it doesn't float, place it on something that does, such as a leaf.
- ⑤ The metal will align north and south.
