

*Repels nuisance birds simply, safely, and effectively.*

WhirlyBird Repeller Product Specifications for PRO and BREEZE units

Dimensions:

The PRO unit body measures 10.5" high with a wingspan of 6".

The BREEZE unit body measures 12.5" high with a wingspan of 7".

Both PRO and BREEZE are mounted on a 14" long and 3/4" diameter PVC pipe.

Features:

The WhirlyBird is manufactured with UV resistant polycarbonate plastic that complies with Military Specification A-A-59502 for ultraviolet (UV) stabilized plastic.

PVC pipe is UV stabilized.

Fasteners are stainless steel.

The PRO WhirlyBird Repeller has been tested and can withstand high wind gusts such as those found at the top of cell towers and offshore navigational aids.

Parts included with your WhirlyBird Repeller:

(1) WB Repeller unit (either the Breeze or the Pro)

3/4" diameter PVC Center coupling

14" long 3/4" diameter PVC pipe extension

3/4" PVC female and male threaded connectors

(can be used in lieu of center coupling to allow removal)

Mounting Base (intended to be used on top of posts and pilings with the 14" pipe extension)

(4) 1 1/2 " stainless steel Phillips head screws

Birds are wild creatures, for which there is a certain level of unpredictability. What may work to repel a particular kind of bird along the South Carolina coast may not work against that same kind of bird elsewhere. That is why we offer a **45 day money back guarantee**.
