

### Add a touch of elegance to any pond, pool or formal fountain with these arching jets of water

- Flow range of 800 gph to 1500 gph recommended, can be installed with most small pumps
- A 6' to 10' arch with heights of 5' to 6' is ideal, longer arches can be made when installing indoors where there is no wind
- For use in clean water applications, internal sponge filters remove fine particles that can disturb flow — periodic cleaning of sponges is necessary to maintain proper flow
- 1" barbed inlet
- Seven color changing LED light has 16' power cord/transformer and remote control

*LED light remote control lets you choose and lock on any color or have it rotate through the colors*

### Dimensions: for reference only, angle of unit will change size dimensions

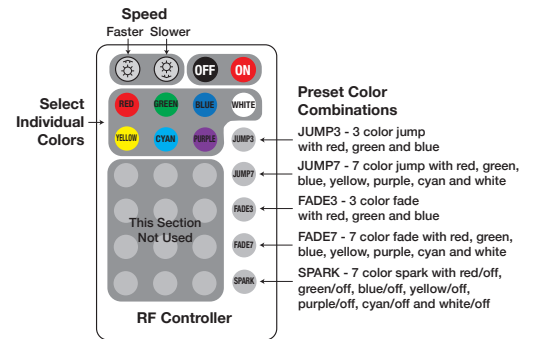

Adjustable Mounting Bracket

### Specifications:

- 304 Stainless steel construction
- Inlet: 1" O.D. barb
- Nozzle opening: 3/8"
- Electrical Requirement — LED operates on AC/DC 12 volt power adaptor with inline LED Controller, 16' cable to LED controller
- LED Light — 3 watt (max) RGB
- Adjustable mounting bracket for desired angle and secure placement options
- Ideal installation: 6' to 10' spray distance with 5' to 6' maximum arch height

*Kit available — includes pump, ball valve, fittings and 12' of tubing*
