

MARK KING

SIGNATURE SERIES BASS AMP

Developed in close consultation with the legendary British bass player, the new Ashdown Labs MK500 Mark King Signature Series bass amp delivers breathtaking clarity, precision tone shaping facilities and a stunning dynamic range. An advanced design using only discrete components with no ICs ensures absolute sonic integrity, while the revolutionary Harmonic Emphasis control introduces a stunning top-end 'zing' – like permanently playing with a new set of strings!

**"It's so dynamic – so alive!
This amp takes my sound
to a whole new level."**

ASHDOWN LABS

HIGH-TECHNOLOGY BASS AMP DEVELOPMENT PROGRAMME

SUPERFLY

PROGRAMMABLE BASS AMP

The latest product of the Ashdown Labs development programme, the extraordinary new Superfly combines a sophisticated programmable bass preamp and a powerful 2 x 250 Watts RMS digital power section in a compact bass amp head that weighs in at just 5 Kgs. Programming and storing 7-band EQ settings and compression parameters is easy – either from the front panel or the remote PC editing software supplied. Then simply switch between programmes using a MIDI-compatible pedal for total live performance control. There's even a range of Superfly Neodymium-loaded ultra-lightweight speaker cabinets.

**500 WATTS
99 MEMORIES
5 KGS**
IN STORES AUGUST 05
