

Mark King

Signature Series Bass Amp

Developed in close consultation with the legendary British bass player, the Ashdown MK500 Mark King Signature Series bass amp delivers breathtaking clarity, precision tone shaping facilities and a stunning dynamic range. An advanced design using only discrete components with no ICs ensures absolute sonic integrity, while the revolutionary Harmonic Emphasis control introduces a stunning top-end 'zing' - like permanently playing with a new set of strings!

"It's so dynamic - so alive!
This amp takes my sound
to a whole new level."

Mark King

Celebrating 30 years of Level 42

The Mark King Signature Series Gold-Plated Amp Head

A very special version of a very special amplifier

We're making just thirty examples of this stunning, 24-carat gold plated bass amp, each signed and numbered by the man himself. But don't worry if you're not lucky enough to get your hands on one of these very special amplifiers. The standard Ashdown MK500 Mark King Signature Series head is exactly the same 575-Watt funk powerhouse, minus the bling. See it on the Ashdown website and hear it tour with Level 42. Check out www.level42.com for dates.
