

# Britain's favorite bass amplification. Now built in the USA.

When the UK's favorite bass amp manufacturer made a tube amp head, it was always going to be something very special. The BTA 400 partners a feature-laden ABM EVO III preamp with a sledgehammer 400W tube power section for truckloads of earth-moving bass tone.

Hand-built at the Ashdown factory in Kentucky, US Series cabinets combine massive performance with exceptional value for money. There's a full range of 1x15", 4x10" and 8x10" cabinets, plus a unique 6x10", all constructed from locally-sourced birch play and loaded with US-made drivers.

Born in the UK. Built in the US. Played by the whole world.  
Check out the Ashdown website for more details.

# US SERIES GREAT MUSIC. GREAT BASS AMPS.
