get loaded

The Streets, Dirty Pretty Things, The Automatic, Art Brut.

Introducing the 500-Watt, 30kg bass rig

Developed specifically to partner the remarkable Superfly programmable bass amp head, new Superfly cabinets use ultra-light weight Neodymium-magnet drive units to achieve a dynamic, articulate sound, coupled with previously unimaginable portability. Just sling the amp over your shoulder, pick up a cabinet in one hand and your bass in the other – and you're on the way to the gig!

2 x 10", 1 x 15" and 2 x 8" cabinets are rated at 4 Ohms to enable the full 2 x 250 Watts power of the Superfly to be delivered into a 2-cabinet rig. And for the ultimate in portability, the Superfly 4 x 8" cabinet is wired as 2 x 4 Ohms with separate inputs for each pair of 8" speakers, so you can use just one cabinet with a Superfly head in a compact, 500-Watt system weighing just 30kg.

SUPERFLY

Powerful. Programmable. Portable.

Ashdown launches new flagship bass amp range Classic Series

Proudly built in the UK, the Classic Series is Ashdown Engineering's new flagship bass amp range. Comprising of 500 and 1000-Watt Klystron heads, a selection of cabinets and a range of 500-Watt combos, the Classic Series is about doing everything better – more volume, more dynamics, an extended frequency range and greater versatility. Combining rotary tone controls with additional sliders satisfies both purists and tweekers, while the addition of a dual-band compressor alongside Ashdown-favorites like variable tube grind and a sub-harmonic generator turns the new Classics into powerhouses of tone. And the inclusion of a 4-way footswitch as standard makes Ashdown Classic amongst the most versatile live performance bass amps in the business.

Stamp here for tone

Why should guitarists have all the fun? Ashdown Bass Effects Pedals are designed specifically for bass players and feature true bypass switching to ensure absolute signal integrity. The range includes the Drive Plus, Chorus Plus, Envelope Filter, Sub-Octave Plus and Dual Band Compressor, and you can hear them all on the Ashdown website.
