## COVID 19

In settings where facemasks are not available, healthcare personnel might use homemade masks (e.g., bandana, scarf) for care of patients with COVID-19 as a last resort.

While these products are designed to protect workers from arc flashes, essential industries such as electrical, oil production and refining, linework and other trades are requiring these products for their employees to wear to limit the spread of airborne particles to other employees and the general public.

## PLEASE NOTE

- This is not a N95 rated mask
- Covers face better than a bandana
- Reduce the transmission of droplets

Because of the shortage of proper facemasks, industries and the general public are resorting to other avenues to protect themselves from airborne particles. This helps but is not an N95 mask.

## COMPLIANCE

- Flame Resistant
- ARC Rating (EBT) = 6.4 cal/cm<sup>2</sup>
- NFPA 70E
- HRC/ARC Level 1
- Meets ASTM F1506
- OSHA 1910.269

**MSRP: \$20.99**

**Call for bulk or distributor pricing.**
